

Introduction

1.1 Purpose

This document describes the various functions of our project. The actual design of the various modules and components of **Student Information System** is described in this document, which takes care of various functionalities that our project aims to achieve and for determining the operating characteristics of the system.

1.2 Product Scope

Student Information System (SIS) is a web-based application for students, faculty, academic staff and parents who want to get and retrieve student's whole information instantly via internet. The major benefit of this web portal is to store the students information at one place (like SERVER) and it can be accessed via online interaction. The SIS web portal is to replace the old and traditional file(paper work) storing process. Instead of tedious paper work, students will be able to submit required information electronically, and the departments will be able to evaluate the submissions with a much quicker turnaround.

1.3 Definitions, acronyms, and abbreviations

- **SIS:** Student Information System
- **SERVER:** Refers to the Host machine
- **CLIENT:** Refers to the user of SIS.
- **SQL:** Structured Query Language; used to retrieve information from a database.
- **SQL Server:** A server used to store data in an organized format.
- **BOOLEAN:** A true/false notation
- **UNIQUE KEY:** Used to differentiate entries in a database.
- **LAYER:** Represents a section of the project.
- **DATA STORAGE LAYER:** the section of the assignment referring to where all data is recorded.

Managing Health Care Information Systems Karen A. Wager, Frances Wickham Lee, John P. Glaser, 2005-05-05. Managing Health Care Information Systems teaches key principles, methods, and applications necessary to provide access to timely, complete, accurate, legible, and relevant health care information. Written by experts for students and professionals, this well-timed book provides detailed information on the foundations of health care information management, the history, legacy, and future of health care information systems, the architecture and technologies that support health care information systems, and the challenges for senior management in information technology, such as organization alignment with strategic planning, governance, planning initiatives, and assessing and achieving value. Comprehensive in scope, Managing Health Care Information Systems includes substantial discussion of data quality, regulation, laws and standards, strategies for system acquisition, use and support, and standards and security. Each chapter includes an overview and summary of the material as well as learning activities. The activities provide students with the opportunity to explore more fully the concepts presented. Praise for Managing Health Care Information Systems: This is the first book that comprehensively describes both opportunities and issues in the effective management of information technology in health care. James I. Cash, Ph.D., retired; James E. Robinson, Professor, Harvard Business School, and chairman of IT Committee, Partners HealthCare System, Inc.; Board of Trustees. The challenges of managing information systems and technology in an electronic health care environment are many. Finally, here is a book that succinctly takes the reader from the basics to the boardroom in meeting such challenges. This book is a great resource. Melanie S. Brodnik, Ph.D., director, Health Informatics and Information Management, The Ohio State University. Collaboration among authors, academicians, and a nationally known CIO has produced an excellent resource for graduate students and health care executives who wish to learn about health information technologies, systems, and their management. Ramesh K. Shukla, Ph.D., professor and director, Williamson Institute for Healthcare Leadership, Department of Health Administration, Virginia Commonwealth University.
