divided into several sections each containing three to five chapters Part I High Level Overview contains the first three
chapters The Basics Sound Electrical Signal Electromagnetic Spectrum Chapter 1 The Telephone and the Telephone Line
Chapter 2 and Connecting the Dots Transporting Information Across the Super Highway Chapter 3 Other sections describe
Telecommunications Fundamentals PSTN Public Switched Telephone Network Telecommunications Applications and
Emerging Technologies Objectives and a chapter outline at the beginning of every chapter help to focus readers on the most
important topics to be presented Historical photos on each part opener illustrate how far the telecommunications industry
has come A useful case study is divided among the chapters This helps to bolster the students understanding of
telecommunications by requiring that they apply what they have learned by building a telecommunications network for a
