*Integer Programming and Combinatorial Optimization* Matteo Fischetti, David P. Williamson, 2007-06-26 This book constitutes the refereed proceedings of the 12th International Conference on Integer Programming and Combinatorial Optimization IPCO 2007 held in Ithaca NY USA in June 2007 Among the topics addressed in the 36 revised full papers are approximation algorithms algorithmic game theory computational biology integer programming polyhedral combinatorics scheduling theory and scheduling algorithms as well as semidefinite programs

**Integer Programming and Combinatorial Optimization** Michael Jünger, Volker Kaibel, 2005-05-18 Since its start in 1990 the IPCO conference series held under the auspices of the Mathematical Programming Society has become an important forum for the presentation of recent results in Integer Programming and Combinatorial Optimization This volume compiles the papers presented at IPCO XI the eleventh conference in this series held June 8-10 2005 at the Technische Universität Berlin The high interest in this conference series is evident in the large number of submissions For IPCO XI 119 extended abstracts of up to 10 pages were submitted During its meeting on January 29-30 2005 the Program Committee carefully selected 34 contributions for presentation in non parallel sessions at the conference The final choices were not easy at all since due to the limited number of time slots many very good papers could not be accepted During the selection process the contributions were refereed according to the standards of refereed conferences As a result of this procedure you have in your hands a volume that contains papers describing high quality research efforts The page limit for contributions to this proceedings volume was set to 15 You may find full versions of the papers in scientific journals in the near future We thank all the authors who submitted papers Furthermore the Program Committee is indebted to the many reviewers who with their specific expertise helped a lot in making the decisions

50 Years of Integer Programming 1958-2008 Michael Jünger, Thomas M. Liebling, Denis Naddef, George L. Nemhauser, William R. Pulleyblank, Gerhard Reinelt, Giovanni Rinaldi, Laurence A. Wolsey, 2009-11-06 In 1958 Ralph E Gomory transformed the field of integer programming when he published a paper that described a cutting plane algorithm for pure integer programs and announced that the method could be refined to give a finite algorithm for integer programming In 2008 to commemorate the anniversary of this seminal paper a special workshop celebrating fifty years of integer programming was held in Aussois France as part of the 12th Combinatorial Optimization Workshop It contains reprints of key historical articles and written versions of survey lectures on six of the hottest topics in the field by distinguished members of the integer programming community Useful for anyone in mathematics computer science and operations research this book exposes mathematical optimization specifically integer programming and combinatorial optimization to a broad audience
