Technology Sydney Andrea Whittle is Professor of Management at Newcastle University Business School **The Alternative** Nick Romeo, 2024-01-16 Winners Take All meets Nickel and Dimed in this provocative debunking of accepted wisdom providing the pathway to a sustainable survivable economy Confronted by the terrifying trends of the early twenty first century widening inequality environmental destruction and the immiseration of millions of workers around the world many economists and business leaders still preach dogmas that lack evidence and create political catastrophe Private markets are always more efficient than public ones investment capital flows efficiently to necessary projects massive inequality is the unavoidable side effect of economic growth people are selfish and will only behave well with the right incentives But a growing number of people academic economists business owners policy entrepreneurs and ordinary people are rejecting these myths and reshaping economies around the world to reflect ethical and social values Though they differ in approach all share a vision of the economy as a place of moral action and accountability Journalist Nick Romeo has spent years covering the world s most innovative economic and policy ideas for The New Yorker Romeo takes us on an extraordinary journey through the unforgettable stories and successes of people working to build economies that are more equal just and livable Combining original in depth reporting with expert analysis Romeo explores The successful business owners organizing their companies as purpose trusts as Patagonia recently did to fulfill a higher mission such as sharing profits with workers or protecting the environment The growing deployment of new models by venture capital funds to promote wealth creation for the poorest Americans and address climate change How Oslo s climate budgeting program is achieving the emission reduction targets the rest of the world continues to miss creating a model that will soon be emulated by governments around the world How Portugal strengthens democratic culture by letting citizens make crucial budget decisions The way worker ownership and cooperatives foster innovation share wealth and improve the quality of jobs offering an increasingly popular model superior to the traditional corporation The public sector marketplace that offers decent work and real protections to gig workers in California The job guarantee program in southern Austria that offers high quality meaningful jobs to every citizen Many books have exposed what s not working in our current system Romeo reveals something even more essential the structure of a system that could actually work for everyone Margaret Thatcher was wrong there is an alternative This is what it looks like *Time and Causality* Marc J. Buehner, 2014-08-06 The problem of how humans and other intelligent systems construct causal representations from non causal perceptual evidence has occupied scholars in cognitive science for many decades Most contemporary approaches agree with David Hume that patterns of covariation between two events of interest are the critical input to the causal induction engine irrespective of whether this induction is believed to be grounded in the formation of associations Shanks Dickinson 1987 rule based evaluation White 2004 appraisal of causal powers Cheng 1997 or construction of Bayesian Causal Networks Pearl 2000 Recent research however has repeatedly demonstrated that an exclusive focus on covariation while neglecting contiguity another of Hume s

cues results in ecologically invalid models of causal inference Temporal spacing order variability predictability and patterning all have profound influence on the type of causal representation that is constructed The influence of time upon causal representations could be seen as a bottom up constraint though current bottom up models cannot account for the full spectrum of effects However causal representations in turn also constrain the perception of time Put simply two causally related events appear closer in subjective time than two equidistant unrelated events This reversal of Hume's conjecture referred to as Causal Binding Buehner Humphreys 2009 is a top down constraint and suggests that our representations of time and causality are mutually influencing one another At present the theoretical implications of this phenomenon are not yet fully understood Some accounts link it exclusively to human motor planning appealing to mechanisms of cross modal temporal adaptation or forward learning models of motor control However recent demonstrations of causal binding in the absence of human action and analogous binding effects in the visual spatial domain challenge such accounts in favour of Bayesian Evidence Integration This Research Topic reviews and further explores the nature of the mutual influence between time and causality how causal knowledge is constructed in the context of time and how it in turn shapes and alters our perception of time We draw together literatures from the perception and cognitive science as well as experimental and theoretical papers Contributions investigate the neural bases of binding and causal learning perception methodological advances and functional implications of causal learning and perception in real time

From Reversal of Fortune to Economic Resurgence Banji Oyelaran-Oyeyinka, Oyebanke Abejirin, 2024-11-05 This book examines Nigeria Africa's largest economy and most populous country and Asia in comparative development and sectoral perspectives We traced the divergent growth in wealth between the two regions It takes a novel approach of matching key growth sectors across five selected Asian countries and Nigeria in a cross regional context We found that state and institutional capabilities underlying the generation and diffusion of industrial and technological knowledge in Asia distinguished it from Africa We employ quantitative and qualitative methods including case studies and statistical

econometric methods to analyze factors that separate the sample countries that made rapid economic progress in catching up and those that tend to be stagnating and falling behind Progress made by Asian countries over the last five decades was due in large part to their pursuit of industrialization technological acquisition underpinned by leadership good governance and policies in the right institutional contexts The four Asian countries compared with Nigeria are Indonesia Malaysia South Korea Vietnam and Bangladesh There was not one grand development formula however the strategy broadly consisted of industrial vertical diversification as well as horizontal diversification in agriculture Building industrial capabilities that enable export competitiveness was critical Again while leadership is not usually included in factors of growth the book devotes a chapter to Leadership and Industrialization and another to State Capacity Industrialization and Economic Growth African countries on the contrary took the low road in exporting minerals and raw agricultural commodities with little value addition in the process Africa experienced a reversal of fortune The African condition is manifestly a Reversal of Fortune because in the 1950s they were ahead of or equal to Asia in per capita income as well as in other development metrics We carried out empirical measurement of Reversal of Fortune manifested in economic social technological and industrial conditions by analyzing the disparities in development metrics particularly the levels and rates of growth of national incomes industrialization rates and Human Development Index HDI The differences are stark *Who's Who in America, 1996* Marquis Who's Who, Inc,1995-09 We make very heavy use of WHO S WHO IN AMERICA in our library It s used daily to check biographical facts on people of distinction MARIE WATERS HEAD OF COLLECTION DEVELOPMENT UNIVERSITY OF CALIFORNIA AT LOS ANGELES Marquis Who s Who is proud to announce the Golden Anniversary 50th Edition of WHO S WHO IN AMERICA This the world s preeminent biographical resource keeps pace with a changing America with more than 17 500 new entries each year AND it speeds research with the Geographic Professional Indexes ANNUAL UPDATING enables Marquis Who s Who to bring users more new names to update more existing entries each year Every entry is selected researched to ensure the most current accurate biographical data for Who s Who users The Geographical Professional Indexes makes WHO S WHO IN AMERICA an even more useful research tool Now users can identify locate prospective partners new clients by profession in any of 38 categories as well as by country state or province or city Essential for quickly finding the entries you need More than 92 000 leaders decision makers innovators from every important field business finance government education science technology the arts more are profiled in this Golden Anniversary 50th Edition Entries include name occupation vital statistics parents marriage children education career civic political activities writings creative works awards professional memberships office address When you need authoritative accurate facts on our nation s leaders go to the preeminent record of American achievement that offers new information EVERY year Marquis WHO S WHO IN AMERICA *Accounting for the Exams* Japie Stander,199?
