**by Finlay Sutton (Prosthodontist) with Rowan Garstang**  
**(Dental Technician)**

This complete denture construction protocol is based on the guides published by the British Society of Prosthodontics in 1996. These are as relevant today as when they were first published. The guides can be obtained at: <https://www.bsspd.org/About/BSSPD+guidelines.aspx>. It is relevant to refer to these Guides to Standards in Prosthetic Dentistry as well as these instructions. We attempt to give the patient "prosthodontic privacy". A phrase created by Dr John Besford, whereby only the patient and treating prosthodontic team know that the patient has prosthetic teeth.

Removable prosthodontics is not easy  
Removable prosthodontics is not easy and takes effort and graft to get good at it. Like anything in life that's worth doing – it is hard, but it's definitely worth the effort.

The most important factor in delivering successful dentures  
Technical factors are extremely important but are not the most important factor in delivering successful dentures.  
The patient's education and understanding of their role is the single most important factor in the success of their dentures.
