

P0093 A serious leak in the fuel system, possible causes of the problem:
failure or incorrect data coming from the fuel pressure controller;
mechanical failure of the system, lack of tightness;
damage to wires or cable connector.

To identify the problem should:

- check all of these items;
- make sure that the fuel is drained into the return line;
- check for possible fuel leaks, as well as the fuel pump (it may be clogged).

P1000 This DTC indicates that OBD2 Diagnostic Interface Testing has not been completed. If the problem is due to user actions (starting the engine, turning off the program or the diagnostic scanner), then the testing process must be repeated. Otherwise, verification of the software component of the control unit is required.

MAZDA Exhaust system DTC

P0401 Low efficiency recorded during the operation of the exhaust gas recirculation system. If error P0401 occurs, it is necessary to test the operation of the control module, as well as the integrity of all lines for wear and leakage as a result of mechanical damage.

P1402 Malfunctions in the exhaust gas recirculation system. The on-board computer reports a clogged orifice plate. The problem should be sought in the calibration hole.

P1403 The control unit reports an incorrect connection of the pipes and lines of the exhaust gas recirculation system. Because of this, the readings from the main sensor do not correspond to the normalized parameters.

P1405 Also an error related to the operation of the exhaust gas recirculation system. The on-board computer reports that the gas inlet hose to the inlet to the valve is clogged or missing, i.e. disconnected. It is necessary to check the integrity of the pipe and make sure that the clamp is tightened properly.

MAZDA Fuel vapor control system errors

P0440 The on-board computer detected a malfunction in the control system for the capture of fuel vapor. The type of problem is not specified, therefore, it is necessary to check all the components of the system in turn.

P0441 The control unit has registered a low-quality purge of the vapor recovery system
