This handbook examines the regional and international dynamics of the Middle East. It challenges the state-society dichotomy to make sense of decision making and behavior by ruling regimes. The 33 chapter authors include the world's leading scholars of the Middle East and International Relations (IR) in order to make sense of the region. This synthesis of area studies expertise and IR theory provides a unique and rigorous account of the region's current dynamics, which have reached a crisis point since the beginning of the Arab Spring. The Middle East has been characterized by volatility for more than a century. Although the region attracts significant scholarly interest, IR theory has rarely been used as a tool to understand events. The constructivist approach in IR highlights the significance of state identity shaped by history and culture in making sense of international relations. The authors of this volume consider how IR theory can elucidate the patterns and principles that shape the region in order to provide a rigorous account of the contemporary challenges of the Middle East. *The Routledge Handbook of International Relations in the Middle East* provides comprehensive coverage of International Relations issues in the region. Thus, it offers key resources for researchers and students interested in International Relations and the Middle East. *Handbook of Research on New Dimensions of Gender Mainstreaming and Women Empowerment* Kuruville, Moly, George, Irene, 2020-06-12. It provides a comprehensive coverage of all major gender issues with novel ideas on gender mainstreaming being contributed by men and women authors from multidisciplinary backgrounds. Gender perspective and intersectional approach in the discourses make this handbook a unique contribution to the scholarship of social sciences and humanities. The Oxford Handbook of Iranian History Touraj Daryaee, 2012-02-16 This Handbook is a current comprehensive single volume history of Iranian civilization The authors all

leaders in their fields emphasize the large scale continuities of Iranian history while also describing the important patterns of transformation that have characterized Iran's past. Each of the chapters focuses on a specific epoch of Iranian history and surveys the general political, social, cultural, and economic issues of that era. The ancient period begins with chapters considering the anthropological evidence of the prehistoric era through to the early settled civilizations of the Iranian plateau and continuing to the rise of the ancient Persian empires. The medieval section first considers the Arab-Muslim conquest of the seventh century and then moves on to discuss the growing Turkish influence filtering in from Central Asia beginning in the tenth and eleventh centuries. The last third of the book covers Iran in the modern era by considering the rise of the Safavid state and its accompanying policy of centralization, the introduction of Shi'ism, the problems of reform and modernization in the Qajar and Pahlavi periods, and the revolution of 1978-79 and its aftermath. The book is a collaborative exercise among scholars specializing in a variety of sub-fields and across a number of disciplines including history, art history, classics, literature, politics, and linguistics. Here readers can find a reliable and accessible narrative that can serve as an authoritative guide to the field of Iranian studies.

The Cambridge International Handbook of Lean Production Thomas Janoski, Darina Lepadatu, 2021-03-11. This handbook focuses on two sides of the lean production debate that rarely interact. On the one hand, management and industrial engineering scholars have presented a positive view of lean production as the epitome of efficiency and quality. On the other hand, sociology, industrial relations, and labor relations scholars focus on work speedups, management by stress, trade union positions, and self-exploitation in lean teams. The editors of this volume understand the merits of both views and present them accordingly, bridging the gaps among five disciplines and presenting the best of each perspective. Chapters by internationally acclaimed authors examine the positive, negative, and neutral possible effects of lean, providing a global view of lean production while adjusting lean to the cultural and political contexts of different nation-states. As the first multi-lens view of lean production from academic and consultant perspectives, this volume charts a way forward in the world of work and management in our global economy.

From the dance floor of a tango club to group therapy classes from ballet to community theatre, improvised dance is everywhere. For some dance artists, improvisation is one of many approaches within the choreographic process. For others, it is a performance form in its own right. And while it has long been practiced, it is only within the last twenty years that dance improvisation has become a topic of critical inquiry. With *The Oxford Handbook of Improvisation in Dance*, dancer, teacher, and editor Vida L. Midgelow provides a cutting-edge volume on dance improvisation in all its facets. Expanding beyond conventional dance frameworks, this handbook looks at the ways that dance improvisation practices reflect our ability to adapt, communicate, and respond to our environment. Throughout the handbook, case studies from a variety of disciplines showcase the role of individual agency and collective relationships in improvisation, not just to dancers but to people of all backgrounds and abilities. In doing so, chapters celebrate all forms of improvisation and unravel
