Classroom Paul Baepler, J. D. Walker, D. Christopher Brooks, Kem Saichaie, Christina I. Petersen, 2023-07-03 While Active Learning Classrooms or ALCs offer rich new environments for learning they present many new challenges to faculty because among other things they eliminate the room's central focal point and disrupt the conventional seating plan to which faculty and students have become accustomed. The importance of learning how to use these classrooms well and to capitalize on their special features is paramount. The potential they represent can be realized only when they facilitate improved learning outcomes and engage students in the learning process in a manner different from traditional classrooms and lecture halls. This book provides an introduction to ALCs briefly covering their history and then synthesizing the research on these spaces to provide faculty with empirically based practical guidance on how to use these unfamiliar spaces effectively. Among the questions this book addresses are: How can instructors mitigate the apparent lack of a central focal point in the space? What types of learning activities work well in the ALCs and take advantage of the affordances of the room? How can teachers address familiar classroom management challenges in these unfamiliar spaces? If assessment and rapid feedback are critical in active learning, how do they work in a room filled with circular tables and no central focus point? How do instructors balance group learning with the needs of the larger class? How can students be held accountable when many will necessarily have their backs facing the instructor? How can instructors evaluate the effectiveness of their teaching in these spaces? This book is intended for faculty preparing to teach in or already working in this new classroom environment for administrators planning to create ALCs or experimenting with provisionally designed rooms and for faculty developers helping teachers transition to using these new spaces.

Work-Related Learning and the Social Sciences Gary Taylor, Liam Mellor, Richard McCarter, 2015-09-25 Work Related Learning and the Social Sciences provides a clear and accessible introduction to the theory and practice of work. Written in a student friendly style it makes use of the following Theoretical Perspectives: The theoretical foundations of identity, power, community, citizenship, experiential learning and a range of employability skills provide frameworks for the chapters. Key issues: The book addresses such issues as: How are people socialised at work? Why does conflict occur at work? What types of control are exerted at work? What can we learn about our communities from the work we do? How can we develop our employability skills? Sector examples: Extensive use is made of examples of the working practices of teachers, social workers, police officers, civil servants, third sector workers as well as from people engaged in low skilled work. The student voice: The student voice draws upon the relationship between their own experiences of work and the key issues covered in the book. Written as an introductory text for students studying the social sciences it deals with the ways in which students can appreciate the sociology and politics of work and develop an understanding of their own skills and employability. This book is particularly relevant to students studying work related learning as part of their social science degrees and to those who wish to enhance their employability and prospects in graduate level employment.
