Routledge Handbook of Global Citizenship Studies Engin Isin, Peter Nyers, 2014-06-27 Citizenship studies is at a crucial moment of globalizing as a field What used to be mainly a European North American and Australian field has now expanded to major contributions featuring scholarship from Latin America Asia Africa and the Middle East The Routledge Handbook of Global Citizenship Studies takes into account this globalizing moment At the same time it considers how the global perspective exposes the strains and discords in the concept of citizenship as it is understood

today With over fifty contributions from international interdisciplinary experts the Handbook features state of the art analyses of the practices and enactments of citizenship across broad continental regions Africas Americas Asias and Europes as well as deterritorialized forms of citizenship Diasporicity and Indigeneity Through these analyses the Handbook provides a deeper understanding of citizenship in both empirical and theoretical terms This volume sets a new agenda for scholarly investigations of citizenship Its wide ranging contributions and clear accessible style make it essential reading for students and scholars working on citizenship issues across the humanities and social sciences Introduction to International and Global Studies, Second Edition Shawn C. Smallman, Kimberley Brown, 2015-01-05 This innovative introduction to international and global studies updated and revised in a new edition offers instructors in the social sciences and humanities a core textbook for teaching undergraduates in this rapidly growing field Encompassing the latest scholarship in what is a markedly interdisciplinary endeavor Shawn Smallman and Kimberley Brown introduce key concepts themes and issues and then examine each in lively chapters on essential topics that include the history of globalization economic political and cultural globalization security energy and development health agriculture and food and the environment Within these topics the authors explore such timely and pressing subjects as commodity chains labor including present day slavery human rights multinational corporations and the connections among them New to this edition The latest research on debates over privacy rights and surveillance since Edward Snowden s disclosures Updates on significant political and economic developments throughout the world including a new case study of European Union Icelandic and Greek responses to the 2008 fiscal crisis The newest information about the rise of fracking the Fukushima nuclear disaster the decline of the Peak Oil movement and climate change including the latter s effects on the Arctic and Antarctica A dedicated website with authors blog and a teaching tab with syllabi class activities and well designed classroom tested resources An updated teacher s manual available online including sample examination questions additional resources for each chapter and special assistance for teaching ESL students Updated career advice for international studies majors **Global Citizenship Education** ,2008-01-01 The essays in this edited collection argue that global citizenship education realistically must be set against the imperfections of our contemporary political realities As a form of education it must actively engage in a critically informed way with a set of complex inherited historical issues that emerge out of a colonial past and the savage globalization which often perpetuates unequal power relations or cause new inequalities The essays in the book explore these issues and the emergent world ideologies of globalism as well as present territorial conflicts ethnic tribal and nationalist rivalries problems of increasing international migration and asylum growing regional imbalances and increasing world inequalities Contributors to this collection each on their own way argues that global citizenship education needs to project new values to reality test and debate the language concepts and theories of global citizenship and the proto world institutions that seek to give expression to nascent aspirations for international forms of social justice and citizen participation in world government Many of the

contributors argue that global citizenship education offers the prospect of extending the liberal ideologies of human rights and multiculturalism and of developing a better understanding of forms of post colonialism One thing is sure as the essays presented in this book demonstrate so clearly there can be no one dominant notion of global citizenship education as notions of global citizenship and education are all contested and open to further argument and revision Global citizenship education does not name the moment of global citizenship or even its emergence so much as the hope of a form of order where the rights of the individual and of cultural groups irrespective of race gender ethnicity or creed are observed preserved and protected by all governments in order to become the basis of citizen participation in new global spaces that we might be tempted to call global civil society
