 Tenenberg,2024-05-21 Narratives of Qualitative Research uses a novel form of writing about how to do qualitative research
 called a praxis narrative Each narrative is told from the author s perspective in carrying out one of his past research studies
 in the social sciences Told chronologically and in a first person voice the narratives position the reader alongside the narrator
 so as to vicariously experience how research happens in its situated particulars Rather than a set of idealizations and
 universalized pronouncements the author reveals what really goes on when one is in the thick of complex and challenging
 research studies the points of trouble along with the successes This will be relevant to researchers who have already
 undertaken one or more empirical research studies though not necessarily using qualitative approaches and now find
 themselves facing something new a new analytic method a new theoretical lens a new form of data collection a new domain
 of research questions a new rhetorical approach This requires letting go of the secure handholds of prescribed methods and
 responding to the contingencies that arise in the midst of the research The reader is invited to follow along as the author
 makes visible his praxis of qualitative research Unlike more conventional texts in this unique alternative the reader can
 follow the author s journey through his research studies as a way to reorient their conception of qualitative research and
 their own praxis of it This is fascinating reading for qualitative researchers and students taking qualitative research courses
