Adhyāpana Depārtamēntuva, 1971 *Sri Lanka Education Sector Assessment* Halil Dundar, Benoit Millot, Michelle Riboud, Mari Shoji, Harsha Aturupane, Sangeeta Goyal, Dhushyanth Raju, 2017-06-16 A country's education system plays a pivotal role in promoting economic growth and shared prosperity Sri Lanka has enjoyed high school attainment and enrollment rates for several decades However it still faces major challenges in the education sector and these challenges undermine the country's inclusive growth goal and its ambition to become a competitive upper middle income country The authors of Sri Lanka Education Sector Assessment Achievements Challenges and Policy Options offer a thorough review of Sri Lanka's education sector from early childhood education through higher education With this book they attempt to answer three questions How is Sri Lanka's education system performing especially with respect to participation rates learning outcomes and labor market outcomes How can the country address the challenges at each stage of the education process taking into account both country and international experience and also best practices Which policy actions should Sri Lanka make a priority for the short and medium term The authors identify the most critical constraints on performance and present strategic priorities and policy options to address them To attain inclusive growth and become globally competitive Sri Lanka needs to embark on integrated reforms across all levels of education These reforms must address both short term skill shortages and long term productivity As Sri Lanka moves up the development ladder the priorities of primary secondary and postsecondary education must be aligned to meet the increasingly complex education and skill requirements Education in Ceylon Ceylon. disciplinary procedures and proclivity to discipline vary by both student and teacher gender Likewise a teacher s perception of student characteristics and abilities appear to systematically vary by gender Other studies find male students benefit at the expense of female students in the amount and quality of interaction received from teachers of both genders What has yet to be determined is how these differences in discipline perceptions of student ability and interactions between student and teacher influence student outcomes as measured by standardized exams **Experiments and Innovations in Education**
