LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module in the virtual lab.

MODULE 1: Introduction

At the beginning of the virtual lab, you were asked to select eight lizards from a category. What criteria did you use to select your lizards?

My criteria were: size, color, and shape of the lizards.

Did your lizards grow similar? How? Why?

Yes, they all grew to the same size. I thought about choosing lizards that were all the same size, but I chose lizards that were all the same size and color.

An adaptation is a structure or function that the organism has as a population because it increases the ability to survive and reproduce in a particular environment. Provide one example and an explanation of an adaptation in the lizard lab.

The adaptation of the lizard was its ability to change color. This is an adaptation because it helps the lizard survive and reproduce in its environment.

Provide one evolutionary explanation for why lizards that are able to change color (i.e., the green) would have survived a longer time.

Because the lizards that were able to change color were able to survive longer than the lizards that were not able to change color.
