LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module in the virtual lab.

MODULE 1: Introduction

At the beginning of the virtual lab, you were asked to select eight lizards from a category. What criteria did you use to select your group?

My criteria were: size, color, and shape of the lizards.

Did your teacher grade individual team's efforts?

Yes, my teacher graded our team's efforts. She thought about how many lizards we had selected and how many lizards we had selected that were the same color.

An adaptation is a structure or function that the organism has as a response to its environment. This ability to survive and reproduce is a particular adaptation. Provide one example and an explanation of an adaptation of the lizard group.

One example of an adaptation is the ability to change color. This is a response to the environment. The lizards can change color to blend in with the background.

Provide one evolutionary explanation for why lizards that are able to change color (i.e., the group) would have survived a longer time.

One evolutionary explanation is that lizards that are able to change color have a higher survival rate than lizards that cannot change color.
