Infrared Thermography and Thermal Nondestructive Testing Vladimir Vavilov, Douglas Burleigh, 2020-07-10 This is the first book summarizing the theoretical basics of thermal nondestructive testing TNDT by combining elements of heat conduction infrared thermography and industrial nondestructive testing The text contains the physical models of TNDT heat transfer in defective and sound structures and thermal properties of materials Also included are the optimization of TNDT procedures defect characterization data processing in TNDT active and passive TNDT systems as well as elements of statistical data treatment and decision making This text contains in depth descriptions of applications in infrared thermal testing within aerospace power production building as well as the conservation of artistic monuments The book is intended for the industrial specialists who are involved in technical diagnostics and nondestructive testing It may also be useful for academic researchers undergraduate graduate and PhD university students

Infrared Thermography Recent Advances and Future Trends Carosena Meola, 2012-08-03 Infrared thermography IRT is a non contact non invasive methodology which allows for detection of thermal energy that is radiated from objects in the infrared band of the electromagnetic spectrum for conversion of such energy into a visible image such as a surface temperature map This feature represents a great potential to be exploited in a vast variety of fields from aerospace to civil engineering to medicine to agriculture etc However IRT is still not adequately enclosed in industrial instrumentation and there are still potential users who might benefit from the use of such a technique and who are not aware of their existence This e book conveys information about basic IRT theory infrared detectors signal digitalization and applications of infrared thermography in many fields such as medicine foodstuff conservation fluid dynamics architecture anthropology condition monitoring non destructive testing and evaluation of materials and structures The volume promotes an exchange of information between the academic world and industry and shares methodologies which were independently developed and applied in specific disciplines Scientific and Technical Aerospace Reports ,1994-03 **Energy Research Abstracts** ,1980-05 **Annual Department of Defense**
