**Post Traumatic Stress Disorder and the Law** Trevor Hicks, 2003 Nervous shock cases form an area of law which illustrates well the operation of judicial policy It is possible from such cases to trace the changing attitudes of lawyers doctors and of society in general to psychiatric injury over the last century These cases also highlight the changing judicial attitudes to the scope of duty of care and to the whole issue of policy decisions The recognition of nervous shock similarly illustrates the development of medical knowledge in relation to psychiatric injury The recognition of Post traumatic Stress Syndrome PTSD has been a relatively new and controversial phenomenon and this disorder has now been incorporated into the various classifications of mental disorder as a recognisable psychiatric illness This book examines the development of the law and medical knowledge in relation to cases of nervous shock and in particular to PTSD The expansion and subsequent contraction of liability is shown to be dynamic in nature as both legal and medical knowledge have increased The intention of this book is to provide a concise review of the law comparing it to current medical knowledge in relation to PTSD The book is intended to be of use to professionals involved in psychiatric injury cases who require an up to date understanding of PTSD

and professors interested in air pollution modelling at the graduate level as well as researchers and professionals involved in developing and utilizing air pollution models      Criminal Sentencing as Practical Wisdom Graeme Brown,2017-06-01 How do judges sentence In particular how important is judicial discretion in sentencing Sentencing guidelines are often said to promote consistency but is consistency in sentencing achievable or even desirable Whilst the passing of a sentence is arguably the most public stage of the criminal justice process there have been few attempts to examine judicial perceptions of and attitudes towards the sentencing process Through interviews with Scottish judges and by presenting a comprehensive review and analysis of recent scholarship on sentencing including a comparative study of UK Irish and Commonwealth sentencing jurisprudence this book explores these issues to present a systematic theory of sentencing Through an integration of the concept of equity as particularised justice the Aristotelian concept of phronesis or practical wisdom the concept of value pluralism and the focus of appellate courts throughout the Commonwealth on sentencing by way of instinctive synthesis it is argued that judicial sentencing methodology is best viewed in terms of a phronetic synthesis of the relevant facts and circumstances of the particular case The author concludes that sentencing is best conceptualised as a form of case orientated concrete and intuitive decision making one that seeks individualisation through judicial recognition of the profoundly contextualised nature of the process      Labor and Delivery Care Wayne R. Boscolo-Berto,Guido Viel,2016-10-06 This volume serves to provide an international overview of personal injury compensation in different geographical areas 15 countries already included with a special focus on the methods used to ascertain the injury and the related damages It also goes on to clarify the logical and methodological steps required for a sequential in depth ascertainment of any traumatic event and the related personal damage both pecuniary and non pecuniary

Personal injury is a legal term for an injury to the body mind or emotions suffered by the plaintiff under tort and or civil law regulations Damages related to the injury can be pecuniary or non pecuniary in nature Although several comparative studies and research projects on tort and civil law and personal injury claims aimed at developing new tools for promoting harmonization of private law have been performed at an international level heterogeneity and divergences still exist in the definition and compensation of personal injury and damage across different national legislative systems The starting point for any awarding procedure should be a medical or rather a medico legal assessment to gain evidence on the trauma or event causing the injury the mechanism of injury the pre existing health status of the injured party and the health consequences of the injury temporary and permanent impairment work incapacity etc In order to pursue the ultimate goal of an international harmonization of personal injury compensation it is of utmost importance to define the quality requirements for the medico legal ascertainment methodology which are essential for guaranteeing the objectivity rigor and reproducibility of the data and the evidence collection procedure Currently there are no supra national medico legal guidelines dealing with the ascertainment methodology of personal injury and damage under tort and civil law      Compensation for Personal Injury in English, German and Italian Law Basil Markesinis, Michael Coester, Guido Alpa, Augustus Ullstein, 2005-02-24 Cross border claims for personal injuries are becoming more common Furthermore European nationals increasingly join class actions in the USA These tendencies have created a need to know more about the law of damages in Europe and America Despite the growing importance of this subject there is a dearth of material available to practitioners to assist them in advising their clients as to the heads of damage recoverable in other countries This book aims to fill that gap by looking at the law in England Germany and Italy It sets out the raw data in the wider context of tort law then provides a closer synthesis largely concerned with methodological issues and draws some comparative conclusions      **The Law of Damages** A. M. Tettenborn, David Wilby, Daniel Bennett, 2003 This essential text on the Law of Damages provides a comprehensive and authoritative account of the legal principles to be applied in assessing damages It examines the current law and also highlights areas for possible future development The text covers all the key areas and general principles of damages making it an essential text for both practitioners and academics      *Human Rights Law* Merris Amos, 2021-07-15 This textbook comprehensively examines and analyses the interpretation and application of the United Kingdom's Human Rights Act 1998 The third edition has been fully updated to include the last seven years of case law Part I covers key procedural issues including the background to the Act the relationship between UK courts and the European Court of Human Rights the definition of victim and public authority determining incompatibility including deference and proportionality the impact of the Act on primary legislation and damages and other remedies for the violation of Convention rights In Part II of the book the Convention rights as interpreted and applied by United Kingdom courts are examined in detail All of the key Convention rights are discussed including the right to life freedom from torture and inhuman or degrading treatment or punishment the

right to liberty fair trial the rights to private life family life and home freedom of religion and belief freedom of expression the right to peaceful enjoyment of possessions and the right to freedom from discrimination in the enjoyment of Convention rights The third edition of Human Rights Law will be invaluable for those teaching studying and practising in the areas of United Kingdom human rights law constitutional law and administrative law

**Lessons from Medicolegal Cases in Obstetrics and Gynaecology** Swati Jha,Eloise Power,2022-05-12 Presents examples of successful and unsuccessful legal claims in obstetrics and gynaecology with best practice guidance to avoid litigation

**Damages and Human Rights** Jason NE Varuhas,2016-05-19 Winner of the 2018 Inner Temple New Authors Book Prize and the 2016 SLS Peter Birks Prize for Outstanding Legal Scholarship Damages and Human Rights is a major work on awards of damages for violations of human rights that will be of compelling interest to practitioners judges and academics alike Damages for breaches of human rights is emerging as an important and practically significant field of law yet the rules and principles governing such awards and their theoretical foundations remain underexplored while courts continue to struggle to articulate a coherent law of human rights damages The book s focus is English law but it draws heavily on comparative material from a range of common law jurisdictions as well as the jurisprudence of international courts The current law on when damages can be obtained and how they are assessed is set out in detail and analysed comprehensively The theoretical foundations of human rights damages are examined with a view to enhancing our understanding of the remedy and resolving the currently troubled state of human rights damages jurisprudence The book argues that in awarding damages in human rights cases the courts should adopt a vindicatory approach modelled on those rules and principles applied in tort cases when basic rights are violated Other approaches are considered in detail including the current mirror approach which ties the domestic approach to damages to the European Court of Human Rights approach to monetary compensation an interest balancing approach where the damages are dependent on a judicial balancing of individual and public interests and approaches drawn from the law of state liability in EU law and United States constitutional law The analysis has important implications for our understanding of fundamental issues including the interrelationship between public law and private law the theoretical and conceptual foundations of human rights law and the law of torts the nature and functions of the damages remedy the connection between rights and remedies the intersection of domestic and international law and the impact of damages liability on public funds and public administration The book was the winner of the 2016 SLS Peter Birks Prize for Outstanding Legal Scholarship and the 2018 Inner Temple New Authors Book Prize
