Jsc Real Question Out 2014:

Lawfare and Judicial Legitimacy Kate Dent, 2023-07-28 Lawfare is a complex and evolving concept with many permutations. It is a term that is used to describe both a judicialisation of politics where the Constitutional Court is called upon to uphold constitutional responsibilities compensating for institutional failures in the broader democratic space and instances where there is abuse of the legal process to escape accountability. When the court is dragged into politics it forces an examination of the legitimate scope of judicial review. This book explains how judicialisation of politics leads to the politicisation of adjudication and further weaponisation of the law. Exploring the judicial political dynamics of South Africa from 2009 onwards the work traces the consequences of the judicialisation of politics for institutional resilience and broader constitutional stability. Through an in depth study of judicial legitimacy the book seeks to provide an overarching theoretical justification for the dangers that inhere in lawfare. It analyses the potential costs of both judicial statesmanship and strategies of deference and avoidance when trying to navigate the Court safely through the era of lawfare. South Africa offers an interesting crucible within which to observe an unfolding global trend. Strengthened by its comparative focus the implications of lawfare presented in this book transcend the South African context and are applicable to other jurisdictions in the world. The book will be of interest to researchers academics and practitioners working in the areas of Constitutional Law and Politics.

Business 4.0 as a Subject of the Digital Economy Elena G. Popkova, 2022-06-14 This book substantiates the transformation processes in the system of modern entrepreneurship in the conditions of formation of Industry 4.0. The authors develop a scientific concept of business 4.0, determine the specific features of business 4.0 and current problems and perspectives of its development in developed and developing markets, study the infrastructural provision of business 4.0 in view of its sectorial specifics, outline the perspectives and recommendations in the sphere of development of business 4.0 and offer the scientific and practical recommendations for state and corporate management.

Economic Development and Entrepreneurship in Transition Economies Jovo Ateljević, Jelena Trivić, 2016-04-05 This book contributes to a better understanding of entrepreneurship in transition economies. Current literature reflects the more traditional schools of thought on entrepreneurship which are influenced by the Western perspective and fail to fully address the scenario in transition economies. There is a broad consensus among academics, policy makers and practitioners that a fundamental cause of difficulties experienced by most economies in transition has been the fact that reform has not been accompanied by the creation of new private businesses and particularly SMEs. This is especially evident in states created in Europe after the dissolution of the Soviet Union where many barriers which were inherited from the old system remain in place thus inhibiting entrepreneurial progress in these countries despite a favorable political and economic environment. The contributions featured in this book focus on how much progress has been achieved so far with regard to these aspects as well as identify which current barriers and issues still need to be resolved. Themes include innovation, performance, financing, venture capital.

educational factors and entrepreneurial learning *Intellectual Property in Russia* Natalia M. Udalova, Anna S. Vlasova, 2021-07-28 Intellectual property rights are essential for a firm's competitive edge and success and form the significant assets for many firms. The authors of this book argue that intellectual property is a complex phenomenon which inevitably requires a combination of both economic and legal considerations because the lack of understanding of the mechanisms for the protection and preservation of IP can serve to undermine any of the potential economic benefits. The book outlines the opportunities that can be derived from the use of IP in business and also identifies the rules necessary for their implementation. It offers a comprehensive systemic research of intellectual property based on the most up-to-date legislation and cases of IP use in Russia. Such an approach will allow readers to fully understand the peculiarities of IP as a special phenomenon of the Russian market. There is a good balance between theoretical knowledge and practical implementation and the plain language and unique approach to structuring information make the book accessible and easy to understand. It contains a special glossary of terms to facilitate the understanding of the material presented in the book. Although the book looks specifically at the Russian case, it will have international appeal since intellectual property by its very nature has become a transnational phenomenon. Moreover, the international regulatory framework provides for the similarity of legal regulation of IP. The book will find an audience among researchers concerned with the economics and law of intellectual property as well as policymakers and practitioners involved in business IP. *DIFC Courts Practice* Rupert Reed, Tom Montagu-Smith, 2020-05-29 The DIFC Courts Practice is the definitive guide to the practice and procedure of the Courts of the Dubai International Financial Centre (DIFC), which is now firmly established as a leading international commercial court. *Innovation-Based Development of the Mineral Resources Sector: Challenges and Prospects* Vladimir Litvinenko, 2018-10-11 Innovation Based Development of the Mineral Resources Sector: Challenges and Prospects contains the contributions presented at the XI Russian German Raw Materials Conference, Potsdam, Germany, 7-8 November 2018. and to identify future directions for proportionality in Australia at a time when the doctrine is in its formative stages The book has three broad aims First it considers the role of facts within proportionality reasoning Second it offers procedural insights into fact finding in constitutional litigation Third the book s analysis of the dynamic Australian case law on proportionality means it also serves to clarify the nature and status of proportionality in Australia at a critical moment Since the 2015 decision of *McCloy v New South Wales* where four justices supported the introduction of a structured three part test of proportionality the Court has continued to disagree about the utility of such a test These developments mean that this book with its doctrinal and comparative approach is particularly timely
