contemporary history science and technology studies human animal relations and policy research to conduct a cross cutting analysis It explores the worldviews of those involved with animal health disease ecology and badger protection between the 1970s and 1990s before reintegrating them to investigate the recent public polarisation of the controversy Finally it asks how we might move beyond the current impasse

China's Global Quest for Resources Fengshi Wu, Hongzhou Zhang, 2016-11-18 The world's key resources of energy food and water which are closely connected and interdependent on each other are coming under increasing pressure as a result of increasing population development and climate change In the case of China following its recent economic surge energy food and water are already nearing the point of shortage This book considers how China is working to avoid shortages of energy food and water and the effect this is having internationally Subjects covered include domestic policy debates on China's resource strategies challenges for managing transboundary waters related to China's responses from various regions and countries to China's Go Out strategy and China's increasing energy links with Russia and declining agricultural trade with the United States The book concludes by discussing in comparative perspective China's outward resource acquisition activities and the consequent policy implications

Environmental Water Markets and Regulation Katherine Owens, 2016-11-18 River systems around the world are degraded and are being used unsustainably Meeting this challenge requires the development of flexible regimes that have the potential to meet essential consumptive needs while restoring environmental flows This book focuses on how water trading frameworks can be repurposed for environmental water recovery and aims to conceptualise the most appropriate role for law in supporting recovery through these frameworks The author presents a comprehensive study of the legal frameworks in four jurisdictions the States of Oregon and Colorado in the western United States the province of Alberta in Canada and the Murray Darling Basin in Australia Basin State of New South Wales A close comparative analysis of these four jurisdictions reveals a variety of distinctive regulatory arrangements and collaborations between public and private actors In all cases the law has been deployed to steer and coordinate these water governance activities The book argues that each regime is based on a particular regulatory strategy with different conceptions of the appropriate roles for and relationships between various actors and institutions Legal frameworks do not have the capacity to rationalise and provide an overarching and absolute solution to the complex environmental and governance issues that arise in the context of environmental water transactions Rather the role of law in this context needs to be reconceptualised within the paradigm of regulatory capitalism as establishing and maintaining the limits within which regulatory participants can operate innovate and collaborate

The Case for Pandora James M. Essig, Steve McCarter, 2017-01-12 This book is about building craft for space travel space travel not in the far distant future but in the immediate future There is no question that we have the technology to build and power a large craft capable of traversing the galaxy and for now this book will focus on achieving the goal of intragalactic travel We will describe various methods of power generation and propulsion delineate the materials and technology for construction

discuss the building of the spacecraft from the outside in and show what is required to sustain life on the craft for extended periods of time While we will go into some detail on each of these pointing out advantages and disadvantages to components and methods this is not nor is it intended to be a highly technical book to be used by specialists Rather it is intended to inform the general readership about what is possible and perhaps what is not in building and operating spacecraft for long distance and long duration travel with current and available means

Karen Hokanson, Andrew F. Roberts, Joerg Romeis, Joe Smith, Alan Raybould, 2021-10-14 Global Agriculture and the American Farmer Kimberly Ann Elliott, 2017-06-27 The United States is one of the world's largest producers and exporters of a range of agricultural commodities and the largest provider of foreign assistance so U.S. policies have big effects on global food security and other global public goods linked to agriculture On the positive side of the ledger President Obama created the Feed the Future aid initiative to promote agricultural development in poorer countries as a tool to achieve the global goals of ending hunger and extreme poverty which are mostly rural But that generosity is undercut by U.S. support for farmers that distorts global markets and ignores negative spillovers for the rest of the world In this book Elliott focuses on three policy areas that are particularly damaging for developing countries traditional agricultural subsidy and trade policies that support the incomes of American farmers at the expense of farmers elsewhere the biofuels mandate which in its current form increases market volatility while doing little if anything to mitigate climate change and weak regulation of antibiotic use in livestock which contributes to the global spread of drug resistant super bugs While noting that broad reforms are needed to fix these problems Elliott also identifies practical steps that U.S. policymakers could take in the relatively short run to improve farm policies for American taxpayers and consumers as well as for the poor and vulnerable in developing countries

The BRICS Studies Xu Xiujun, 2020-05-14 Given their immense potential for development and representation of a new international political and economic order the BRICS countries have become a strong nascent force on the global stage However as overall economic growth continues to slow down and the geopolitical situation becomes more complex the BRICS countries are facing a series of new challenges that require further development in the way they cooperate with one another This volume offers a panoramic view of cooperation between the BRICS countries in the light of these new challenges The editors reveal that policy coordination has been strengthened bringing into play complementary advantages as viable ways for promoting robust sustainable and balanced growth in the world economy They argue that the experience gained and lessons learned in the development of and cooperation between the BRICS countries has offered a positive role model for cooperation between other countries as well as providing valuable lessons for research in international politics Students and scholars in international relations and politics will benefit from this volume

Oceanic Japan Stefan Huebner, Nadin Heé, Ian Jared Miller, William M. Tsutsui, 2024-11-30 Japan's oceans demand our attention Violent prolific and changeful they define life and death on the archipelago pushing the shore under the rush of tsunami charging typhoon circulation feeding millions

and seeding conflicts over territory and resources And yet Japan studies remains largely beholden to a terrestrial view of the world that is at odds with the importance of the sea This terrestrial bias also means that on those occasions when oceans are recognized they are most often presented as dividers or connectors spaces in between rather than rich ecologies and meaningful sites Oceanic Japan is meant to help readers re envision Japanese history in order to show how the seas created the country that we know today The book convenes a diverse multinational multidisciplinary group of scholars to expand the scope of Japan studies and the field of environmental humanities The chapters draw from the broader turn to the sea characterized by new oceanic and terraqueous perspectives developing within these fields and in areas such as Pacific history and Indian Ocean studies The volume editors vision is bifocal On one hand they aim to reorient East Asian studies and Japan studies to the sea underlining how oceans have shaped dynamics from the Tokugawa Era forward into the age of empire and the crisis of the Anthropocene On the other hand they argue for a more nuanced environmental approach within the burgeoning field of Oceanic studies Seeing oceanic spaces as more than entrepôts or political spheres requires thinking in new often vertical volumetric ways The chapters follow human and non human actors to recognize the variegation of watery ecologies through winds tides coasts seabeds and currents such as the Kuroshio and Oyashio which have always shaped life on the archipelago

Rewriting Nature Paul Enríquez, 2021-06-24 Rewriting Nature is a cogent riveting interdisciplinary exploration of the law science and policy of emerging genome editing technology

Treaties in Force 2012, 2013-03 Lists treaties and other international agreements of the United States on record in the Department of State on January 1 2012 which had not expired by their terms or which had not been denounced by the parties replaced or superseded by other agreements or otherwise definitely terminated Published annually

Imagined Futures in Science, Technology and Society Gert Verschraegen, Frédéric Vandermoere, Luc Braeckmans, Barbara Segaeert, 2017-04-07 Imagining forecasting and predicting the future is an inextricable and increasingly important part of the present States organizations and individuals almost continuously have to make decisions about future actions financial investments or technological innovation without much knowledge of what will exactly happen in the future Science and technology play a crucial role in this collective attempt to make sense of the future Technological developments such as nanotechnology robotics or solar energy largely shape how we dream and think about the future while economic forecasts gene tests or climate change projections help us to make images of what may possibly occur in the future This book provides one of the first interdisciplinary assessments of how scientific and technological imaginations matter in the formation of human ecological and societal futures Rooted in different disciplines such as sociology philosophy and science and technology studies it explores how various actors such as scientists companies or states imagine the future to be and act upon that imagination Bringing together case studies from different regions around the globe including the electrification of German car infrastructure or genetically modified crops in India Imagined Futures in Science Technology and Society shows how science and technology create novel forms of

imagination thereby opening horizons toward alternative futures By developing central aspects of the current debate on how scientific imagination and future making interact this timely volume provides a fresh look at the complex interrelationships between science technology and society This book will be of interest to postgraduate students interested in Science and Technology Studies History and Philosophy of Science Sociology Cultural Studies Anthropology Political Sciences Future Studies and Literary Sciences **Hansard's Parliamentary Debates** Great Britain. Parliament,1881 *Hansard's Parliamentary Debates* ,1879 **Intellectual Property Law** Lionel Bently,Brad Sherman,Dev Gangjee,Phillip Johnson,2022 Intellectual Property Law is the definitive textbook on this subject an all embracing and detailed guide to intellectual property law It clearly sets out the law in relation to copyright patents trade marks passing off and confidentiality whilst enlivening the text with illustrations and diagrams **Parliamentary Debates** ,1879 **Food Chains: Quality, Safety and Efficiency in a Challenging World** George Baourakis,Prodromos Kalaitzis,Konstadinos Mattas,2014-01-02 Food Chains Quality Safety and Efficiency in a Challenging World addresses the many issues facing European food producers and other food chain stakeholders who endeavour to improve their competitive position in a highly competitive world food market The Food Chain is one of the main economic pillars in Europe providing employment and opportunities for economic development in rural areas It is therefore imperative to continuously monitor the changes that affect the sector in order to allow stakeholders to respond promptly and effectively to the new market conditions Adjusting to the new market involves new technology globalization demographic and social changes within a challenging market environment In order to adopt these new market parameters food chain stakeholders need to adapt their activities in order to gain in terms of effectiveness and efficiency This book was originally published as a special issue of Food Economics Acta Agricultura Scandinavica Section C Regional Developments Badiane, Ousmane,Makombe, Tsitsi,Collins, Julia,Breisinger, Clemens,Al-Riffai, Perrihan,Ecker, Olivier,Saade, Maurice,Akramov, Kamiljon T.,Cohen-Cline, Noah,Joshi, Pramod Kumar,Kishore, Avinash,Díaz-Bonilla, Eugenio,Torero, Máximo, This 2013 Global Food Policy Report is the third in an annual series that provides an in depth look at major food policy developments and events Initiated in response to resurgent interest in food and nutrition security the series offers a yearly overview of the food policy developments that have contributed to or hindered progress in achieving food and nutrition security It reviews what happened in food policy and why examines key challenges and opportunities shares new evidence and knowledge and highlights emerging issues **Building Sustainable Agriculture for Food Security in the Euro-Mediterranean Area** Maria Cristina Paciello,2015-06-19 Sustainable agrocolture and food security are of particular concern for the countries of the Middle East and North Africa MENA region and represent one of the biggest challenges facing the area As a consequence of the region s heavy reliance on food imports the sharp increase in food prices since 2007 and the consequent world food crisis has had macro economic problems inflation trade deficits fiscal pressure increased poverty and political instability This challenge coupled with the consequences of environmental

degradation water scarcity urbanization and climate stress call for the urgent development of sustainable agriculture has mostly been ignored in Euro Mediterranean relations due to strong opposition from the EU However academics and policymakers have increasingly acknowledged that agriculture that needs to be placed at the core of Euro Mediterranean regional cooperation Given the sensitiveness and strategic importance of agriculture for both shores of the Mediterranean the IAI and the OCP Policy Center jointly organized a two day conference in Rabat on November 20 21 2014 to discuss food security and agriculture challenges in the framework of Euro Mediterranean relations The present volume collects the updated and revised versions of the twelve papers that were discussed in that meeting
