Advances in Civil Engineering and Transportation IV Xiang Dong Zhang, Zhang Bin, 2015-03-23 Selected peer reviewed papers from the 4th International Conference on Civil Engineering and Transportation ICCET 2014 December 24 25 2014 Xiamen China *GM Crops and the Global Divide* Jennifer Thomson, 2021-01-20 Attitudes to GM crops continue to generate tension even though they have been grown commercially for over 20 years Negative sentiment towards their development

limits their adoption in Western countries despite there being no evidence of harm to human health. These unfounded concerns about genetically modified crops have also inhibited uptake in many countries throughout Africa and Asia, having a major impact on agricultural productivity and preventing the widespread cultivation of potentially life-saving crops. GM Crops and the Global Divide traces the historical importance that European attitudes to past colonial influences, aid trade and educational involvement have had on African leaders and their people. The detrimental impact that these attitudes have on agricultural productivity and food security continues to be of growing importance, especially in light of climate change, drought and the potential rise in sea levels, the effects of which could be mitigated by the cultivation of GM and gene-edited crops. Following on from her previous books *Genes for Africa*, *GM Crops: The Impact and the Potential* and *Food for Africa*, Jennifer Thomson unravels the reasons behind these negative attitudes towards GM crop production. By addressing the detrimental effects that anti-GM opinions have on nutrition security in developing countries and providing a clear account of the science to counter these attitudes, she hopes to highlight and ultimately bridge this global divide. **Challenges in**
