**AERO TRADER & CHOPPER SHOPPER, FEBRUARY 1998** Causey Enterprises, LLC, **Aspirational Power** David R. Mares, Harold A. Trinkunas, 2016-06-28 Brazil's soft power path to major power status The largest country in South America by land mass and population Brazil has been marked since its independence by a belief that it has the potential to play a major role on the global stage Set apart from the rest of the hemisphere by culture language and history Brazil has also been viewed by its neighbors as a potential great power and at times a threat But even though domestic aspirations and foreign perceptions have held out the prospect for Brazil becoming a major power the country has lacked the capabilities particularly on the military and economic dimensions to pursue a traditional path to greatness Aspirational Power examines Brazil as an emerging power It explains Brazil's present emphasis on using soft power through a historical analysis of Brazil's three past attempts to achieve major power status Though these efforts have fallen short this book suggests that Brazil will continue to try to emerge but that it will only succeed when its domestic institutions provide a solid and attractive foundation for the deployment of its soft power abroad Aspirational Power concludes with concrete recommendations for how Brazil might improve its strategy and why the great powers including the United States should respond positively to Brazil's emergence

Wheeler, 2009 America s Defense Meltdown Pentagon Reform for President Obama and the New Congress describes how America s armed forces are manned and equipped to fight at best enemies that do not now and may never again exist and to combat real enemies ineffectively at high human and material cost Given that many regard America s military as the best in the world how can this be In answer to this question 13 non partisan Pentagon insiders retired military officers and defense specialists lay out an array of hard hitting and well documented charges against our current defense establishment They demonstrate that the hugely expensive and excessively complex weapons embraced by the Pentagon and Congress as vital for our national defense are barely adequate for engaging in outmoded 20th century forms of

warfare They are woefully inadequate for fighting a 21st century fourth generation war as we've learned so painfully in Iraq and Afghanistan At least as disturbing is the condition of the US defense budget Over time policy makers of all political stripes have created budgets that have made our forces smaller less well equipped and less ready to fight all at dramatically increasing cost Fortunately the book's authors offer real world solutions to all the problems they identify At the same time however they remain pessimistic about the prospects for real change arguing that in a system that measures merit by the amount of money spent the reform proposals elaborated in this book are likely to meet intense resistance As Winslow Wheeler remarks The changes require a president with an iron will who will require real not cosmetic reforms of a system determined to and skilled at countering them It will also require a president who will stick with the process for years continuously making decisions that will ultimately reverse the present disastrous course U S national security is now on
