Venture Capital Stefano Caselli, Stefano Gatti, 2004 Josh Lerner Jacob H Schiff Professor of Investment Banking Harvard Business School and National Bureau of Economic Research During much of the 1970s and 1980s venture capital and private equity remained largely a United States phenomena Over the past decade how ever private equity has spread around the globe taking particularly firm root in Western Europe indeed growing 4 700% since 1984 through 200 I Today Europe is the dominant private equity market outside the United States Despite this tremendous growth and the current recessionary cli mate there is ample room for attractive expansion in European private eq uity both for venture capital and private equity There have been several reasons for this growth The first has been the internationalization of capital sources The key sources of capital for Euro pean private equity funds have traditionally been segmented by national boundaries historically the pattern in Europe has been for private equity groups to raise funds from banks insurance companies and government bodies in their own country with little involvement from foreign investors These barriers are now breaking down for two principal reasons First in stitutional investors particularly in the United States have become in creasingly interested in European funds Second many international pri vate equity firms have become more active in Europe A second driver of growth has been the entry of new talent into the in dustry Traditionally many European private equity investors had come from financial or consulting backgrounds rather than from operating roles

Venture Capital, Entrepreneurship, and Public Policy Vesa Kanninen, Christian Keuschnigg, 2004-12-03 Experts in public economics and financial economics discuss the special role of venture capital and if public policy should promote the venture capital industry empirical and theoretical perspectives are developed The existing literature in both public economics and financial economics often fails to consider how appropriate and effective public policy may be in promoting the venture capital industry Public economics has dealt extensively with the effect of taxes and subsidies but has neglected the unique role of venture capitalists as active investors who provide not only funding but added value Financial economics has emphasized the special role of the venture capitalist but has not focused on the real effects of venture capital in industry equilibrium or the role of public policy This volume in the CESifo Seminar series brings together experts in public and

financial economics to develop a theoretically and empirically informed international policy perspective for an era in which policymakers increasingly look to venture capital as a source of jobs innovation and economic growth The chapters in part I analyze data on the levels of venture capital fundraising in Europe problems in the bank oriented beginnings of German venture capital finance in the 1970s and the inefficiency of Canadian labor sponsored venture capital funds Part II looks at the effect of venture capital on labor market performance the importance of exit opportunities and the effect of information inflows on the venture capital cycle The chapters in part III take the perspective of public economics reviewing the role of public policy in addressing potential market failures improving the quality of venture capital investments and affecting entrepreneurial business activity through tax policy

Real Venture Capital Richard Thompson, 2006 A principal theme of the book is a plea for real venture capital which is indeed its title with the aim of creating new companies in high growth international markets such as healthcare and technology often involving the use of science based products The theories and criteria put forward are based upon the venture capitalist adding substantial value to companies and their founders through a wide knowledge of business covering markets products technologies and management as well as of finance This is in marked contrast to the more concentrated financial skills required in other areas of the private equity field such as leveraged buy outs Based on the author's 30 years plus of international experience within the venture sector it is written for would be venture capitalists entrepreneurs who may need to choose a venture capital partner and private and institutional investors who would like to know more about the sector and what to look for in it The book is also likely to be of interest to professional firms and individuals such as accountants investments banks lawyers and stockbrokers
