

## Evidence for Evolution

**Part A - Homologous Structures:** Evolution is defined as the change in the inherited characteristics of biological populations over successive generations. For each question below, identify whether the evidence is **anatomical** (body) – **homologous structures**, **anatomical** (body) – **analogous structures**, **molecular** (DNA) – **homologous structures**, **molecular** (DNA) – **analogous structures**, or from the **fossil record**. Then, using complete sentences, explain how it serves as evidence for evolution.

**Example:** Humans and dolphins have the same bones making up their arms and fins.

- a. Identify the evidence for evolution.

**Anatomical – Homologous Structures**

- b. Explain how this serves as evidence for evolution.

**The arm and fin have similar construction, yet perform different functions. This means these are anatomically similar structures inherited from a common ancestor.**

1. Scientists discover preserved bones of a large animal that no longer exists today.

- a. Identify the evidence for evolution.

- b. Explain how this serves as evidence for evolution.

2. The human gene for muscle protein differs from the muscle protein in monkeys in 4 places. It differs from the muscle protein in chickens in 25 places.

- a. Identify the evidence for evolution.

- b. Explain how this serves as evidence for evolution.

3. Humans, rabbits and whales all have an appendix, an extra piece in their digestive system. In humans, this structure is much smaller and is thought to no longer serve a purpose.

- a. Identify the evidence for evolution.

- b. Explain how this serves as evidence for evolution.

**Teaching About Evolution and the Nature of Science** National Academy of Sciences, Division of Behavioral and Social Sciences and Education, Board on Science Education, Working Group on Teaching Evolution, 1998-04-06 Today many school students are shielded from one of the most important concepts in modern science evolution In engaging and conversational style Teaching About Evolution and the Nature of Science provides a well structured framework for understanding and teaching evolution Written for teachers parents and community officials as well as scientists and educators this book describes how evolution reveals both the great diversity and similarity among the Earth s organisms it explores how scientists approach the question of evolution and it illustrates the nature of science as a way of knowing about the natural world In addition the book provides answers to frequently asked questions to help readers understand many of the issues and misconceptions about evolution The book includes sample activities for teaching about evolution and the nature of science For example the book includes activities that investigate fossil footprints and population growth that teachers of science can use to introduce principles of evolution Background information materials and step by step presentations are provided for each activity In addition this volume Presents the evidence for evolution including how evolution can be observed today Explains the nature of science through a variety of examples Describes how science differs from other human endeavors and why evolution is one of the best avenues for helping students understand this distinction Answers frequently asked questions about evolution Teaching About Evolution and the Nature of Science builds on the 1996 National Science Education Standards released by the National Research Council and offers detailed guidance on how to evaluate and choose instructional materials that support the standards Comprehensive and practical this book brings one of today s educational challenges into focus in a balanced and reasoned discussion It will be of special interest to teachers of science school administrators and interested members of the community *Prepared to Answer* Rob van de Weghe, 2008

**Glencoe Life Science** McGraw-Hill/Glencoe, 1996-07 *The Prehistory of Music* Iain Morley, 2013-10-24 Music is possessed by all human cultures and archaeological evidence for musical activities pre dates even the earliest known cave art Music has been the subject of keen investigation across a great diversity of fields from neuroscience and psychology to ethnography archaeology and its own dedicated field musicology Despite the great contributions that these studies have made towards understanding musical behaviours much remains mysterious about this ubiquitous human phenomenon not least its origins In a ground breaking study this volume brings together evidence from these fields and more in investigating the evolutionary origins of our musical abilities the nature of music and the earliest archaeological evidence for musical activities amongst our ancestors Seeking to understand the true relationship between our unique musical capabilities and the development of the remarkable social emotional and communicative abilities of our species it will be essential reading for anyone interested in music and human physical and cultural evolution Towards a Dynamic Regional Innovation System

Wenying Fu,2015-01-05 Embedding the theoretical discussion on the framework of evolutionary regional innovation systems RIS this book reveals the informal nature of the emerging RIS in China within which interactive learning is organized on the basis of social networks Furthermore in a comparative study in the Pearl River Delta China demonstrates that dirigiste governance in the initial industrialization phase leads to a more mature and developed RIS than does grassroots governance The theoretical developments and empirical investigation presented in this book will grant readers a deeper understanding of the specific features of RIS within the transitional context of emerging economies

**The Earth Through Time** Harold L. Levin,David T. King, Jr.,2016-06-21 The Earth Through Time 11th Edition by Harold L Levin and David T King chronicles the Earth s story from the time the Sun began to radiate its light to the beginning of civilization The goal of The Earth Through Time is to present the history of the Earth and the science behind that history as simply and clearly as possible The authors strived to make the narrative more engaging to convey the unique perspective and value of historical geology and to improve the presentation so as to stimulate interest and enhance the reader s ability to retain essential concepts long after the final exam

**Financial Intermediation in Europe** Luke Drago Spajic,2012-12-06 Two items were firmly on the European economic agenda in the 1990s financial market integration and the creation of a common or single currency The former was supposed to have been achieved in 1992 via the Single Market Act with some derogations and the latter came into being on January 1 1999 This study is concerned with a particular connection between the two themes namely the process of financial intermediation and especially the role of banking

1.1 Financial Monetary Integration in Europe Up until the mid 1980s European financial intermediation was as elsewhere on shore in the post war period broadly characterised by a relatively high degree of diverse regulatory control and with cross border restrictions e.g. in the form of exchange controls This resulted in the administration of interest rates and pegging of prime market yields as well as restrictions on intermediary specialisation Hence it was easy to understand why price competition was hardly ever seen Within this kind of environment banks and other financial intermediaries OFIs competed mainly on non price terms for example through the expansion of branch networks The Single Market Programme SMP launched in 1986 was in a complex way intended to level out and open up the domestic markets of the European Union EU to competition from entities in other Member States

*Weight of Modernity* Cathy Banwell,Dorothy Broom,Anna Davies,Jane Dixon,2012-12-30 Over a half of adults in the US Canada Australia and numerous European countries are now overweight or obese a proportion that has risen sharply in the past two decades Dominant biomedical explanations focus on the energy equation an imbalance between energy intake and expenditure and remedies focus on motivating individuals to restore the balance by eating better and being more active or in extreme cases surgical intervention This book offers a perspective that sees increasing obesity as a social phenomenon as well as a public health problem It contains detailed accounts of three generations of Australians experiences of changing environments and the emergence of social trends such as increasing availability of convenience foods the individualisation

and commercialisation of leisure car reliance and busyness Participants narratives are interwoven with sociological and historical analyses of changes to show how contemporary Australians are experiencing and adapting to dramatic socio cultural and environmental changes that are reshaping their lives and in many cases their bodies The book demonstrates that obesity is an unintended consequence of economic development accompanied by profound socio cultural changes and by identifying the key developments the authors propose leverage points While the research was conducted in Australia the fundamental drivers of rapid weight gain are equally present in other modern secular societies Gaspar Cassadó Gabrielle Kaufman,2016-12-08 Barcelonian Gaspar Cassad 1897 1966 was one of the greatest cello virtuosos of the twentieth century and a notable composer and arranger leaving a vast and heterogeneous legacy In this book Gabrielle Kaufman provides the first full length scholarly work dedicated to Cassad containing the results of seven years of research into his life and legacy after following the cellist s steps through Spain France Italy and Japan The study presents in depth descriptions of the three main parts of Cassad s creative output composition transcription and performance especially focusing on Cassad s plural and multi faceted creativity which is examined from both cultural and historical perspectives Cassad s role within the evolution of twentieth century cello performance is thoroughly examined including a discussion regarding the musical and technical aspects of performing Cassad s works aimed directly at performers The study presents the first attempt at a comprehensive catalogue of Cassad s works both original and transcribed as well as his recordings using a number of new archival sources and testimonies In addition the composer s significance within Spanish twentieth century music is treated in detail through a number of case studies sustained by examples from recovered score manuscripts Illuminated by extraordinary source material Gaspar Cassad Cellist Composer and Transcriber expands and deepens our knowledge of this complex figure and will be of crucial importance to students and scholars in the fields of Performance Practice and Spanish Music as well as to professional cellists and advanced cello students **A Continent Revealed** D. J. Blundell,1992-11-27 The scientific achievements of the European Geotraverse Committee EGT are presented in this unique study of the tectonic evolution of the continent of Europe and the first comprehensive cross section of the continental lithosphere Evolution and Religious Creation Myths : How Scientists Respond Paul F. Lurquin School of Molecular Biosciences Washington State University,Linda Stone Department of Anthropology Washington State University,2007-06-08 Polls show that 45% of the American public believes that humans were created about 10 000 years ago and that evolution is non existent Another 25% believes that changes in the natural world are directed by a supernatural being with a particular goal in mind This thinking clashes frontally with scientific findings obtained in the past 150 years A large portion of the general public espouses the views of creationists and their descendants and ignores or is unaware of scientific advances Critical thinking about the natural world within a scientific framework is lacking in the USA and many parts of the world This manuscript provides a multidisciplinary explanation and defense for the science of evolution not just Darwinism as it is being challenged by

arguments for intelligent design and other creation myths It draws in the life physical and social sciences and recent studies of human evolution that rely much on the idea of change over time which is evolution writ large It puts the evolution ID issue into international perspective by including opinions held in world religions other than Christianity It is clearly written and also can easily be used as a guide for those with some science background The authors make a convincing case that other books do not achieve this as much as they do in this work The book is written for a whole spectrum of educated people including teachers and teachers in training who are interested in the broad issues of the origins of the universe life and humans and who may not quite grasp the potential magnitude of the negative influence on all of science education of people embracing creationist and ID thinking This includes high school teachers and people on boards of education and in municipal governments anyone involved in education It could be used also in college courses such as contemporary social issues and Science and Society sometimes team taught by sociologists and scientists The authors show that when they are teleological dogmatic or politically inspired religious and creation myths threaten scientific efforts The book does not require any extensive knowledge of science The principle of change over time pervades all of science from cosmology to the search for the origin for life to human physical and cultural evolution The book educates readers on scientific matters that overwhelmingly support the idea of evolution not only in the living world but also in physical and social science It explains too how evolution physical and biological is a random unguided process whose roots can be already found in quantum physics

*Island Biogeography* Robert J. Whittaker, José María Fernández-Palacios, Thomas J. Matthews, 2023-06-22 Island biogeography is the study of the distribution and dynamics of species in island environments Due to their isolation from more widespread continental species islands are ideal places for unique species to evolve but they are also places of concentrated extinction Consequently they are widely studied by ecologists evolutionary biologists and conservationists This accessible textbook builds on the success and reputation of its predecessors documenting the recent advances in this exciting field and explaining how islands have contributed to both theory development and testing In addition the book describes the main processes of island formation subsequent dynamics and eventual demise explaining the relevance of island environmental history to island biogeography The authors demonstrate the significance of islands as hotspots of biodiversity and of prehistoric and historic anthropogenic extinction Since island species continue to feature disproportionately in the lists of threatened species today the book examines both the chief threats to their persistence and some of the mitigation measures that can be put in play with conservation strategies specifically tailored to islands
