Fred Hall, III,2021-05-18 Demystifies regression based valuation through simple explanations easy to understand charts and time saving bonus resources Current methodologies using median quartiles or standard deviations to calculate revenue multipliers and cash flow multipliers often produce values that are wildly divergent This forces the appraiser to choose between a very high or a very low value or consider averaging the values opening the possibility for the appraiser to be challenged On the surface regression analysis appears to be the more complex mathematical model so many professionals shy away from using it out of fear that readers will be confused and reject the results of the appraisal
