

Genetics Practice Problems: Pedigree Tables

Remember the following when working pedigree tables:

- [I] Circles are females and squares are males.
- [I] A shaded circle or square indicates that a person has the trait.

The pedigree seen below is the inheritance of color blindness. Shaded individuals are colorblind. First, determine the probable genotype of person I-1. Then answer the questions below the table.

What do you know about the genotype of the mother of I-1?

These parents (I-1 and an color blind man [I-2]) had four children, but color blind males from his mother. Since the mother is not shaded she must be a carrier.

Number II-3 is colorblind just like her father. Where could she get her allele for colorblindness?

She inherited her allele for colorblindness from her mother. Must have been that I-1's wife was a carrier.

Number number II and II were colorblind. How did they have a colorblind son [II-4]?

That mother must be a carrier for color blindness.

What must be the genotype of the parents of a colorblind daughter? Explain.

To have a color blind daughter, she must have the color blind allele from each parent. Her father must be X^bY and mother must have to be X^{bX} or X^{bX} .

If mother II-3 has a normal son, what is the probability that their son will be colorblind?

$X^{bX} \times X^bY \rightarrow$ all of their sons will be colorblind.

$\begin{pmatrix} X^b \\ X \end{pmatrix} \times \begin{pmatrix} X^b \\ Y \end{pmatrix}$ (normal male)

Genetic Practice Problems Pedigree Tables

ML Morrison

Genetic Practice Problems Pedigree Tables:

Social Work and Genetics Sylvia Schild,Rita Beck Black,1984 A significant contribution to professional training Social Work and Genetics is a guide to social work practice with clients who have genetic problems Through their rich clinical experiences in genetic counseling the authors provide a valuable body of knowledge for other professionals who must help individuals and their families cope with the dilemmas occurring as a result of the presence of a possible or real genetic defect or disease Social work students practicing social workers and professionals from various other disciplines will glean an enormous amount of information on basic genetic principles and issues
