Biology 520

Name _____

A family tree of sorts is called a pedigree. The symbols used for a pedigree are:

- female, unaffected
- female, affected
- male, unaffected
- male, affected

Siblings are placed in birth order from left to right and are labeled with Arabic numerals. Each generation is labeled with a Roman numeral. Therefore, the male exhibiting the trait in the pedigree below in the bottom, center would be identified as III-4.

Try to identify the genotypes of all of the individuals above.

1. Is this trait dominant or recessive? Explain your answer.
2. Could you have known the genotype of II-3 and II-4 before they had children? What gave you the essential information to decide that they were heterozygous?
3. Brown eyes are a dominant eye-color allele and blue eyes are recessive. A brown-eyed woman whose father had blue eyes and whose mother had brown eyes marries a brown-eyed man whose parents are also brown-eyed. They have a son who is blue-eyed. Please draw a pedigree showing all four grandparents, the two parents, and the son. Indicate which individuals you are certain of their genotype and where there are more than one possibility.

Gene Worship Gisela Kaplan, Lesley J. Rogers, 2010-08-10 A wonderful antidote to the gene hysteria that is now so dominant What is most exciting about this book is the authors ability to move seamlessly from research on how the brain works to sociology history and philosophy And that I believe is exactly how we need to understand gender neither nature nor nurture but a complex interplay Dr Lynda Birke author of *Feminism and the Biological Body* This work moves beyond the old nature nurture debate concerning what makes us who we are to present a new understanding of gender and sexuality Since the mapping of the human genome there has been widespread coverage of scientific discoveries in the offing and of the host of human problems to be solved through gene therapy from physical defects to mental disease and even so called undesirable behavior As biologists with expertise in neuroscience ethology psychology sociology and human ethos Kaplan and Rogers are uniquely situated to evaluate the claims of their colleagues concerning the knowledge to be gained through the study of our biological make up They caution against the seductive belief that once we understand our biological constitution it is but a short step to complete mastery of human nature Furthermore they show that this belief is yet another example of how science can be subverted to defend the claims of the ruling ideology Endurance Training Basics Ava
