Research for Educational Change Jill Adler, Anna Sfard, 2016-06-17 Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research , Proceedings of the International Conference on Education 2022 (ICE 2022) Aji Prasetya Wibawa, Riska Pristiani, Gulsun Kurubacak, Siti Salina Mustakim, Dedi Kuswandi, Roni Herdianto, 2023-03-22 This is an open access book This conference proceeding constitutes a selection of the best papers from the International Conference on Education 2022 ICE 2022 held in Malang Indonesia in October 2022 This conference proceeding is a collection of research findings and viewpoints relating to education and any subject associated to the present trend of education This trend is lead by the set of improvements and changes in the instructional societal and technological structures and processes towards the endeavor of accomplishing the goals The conference proceeding also extends to compile the papers discussing the issues in relation to emerging technologies for educational context such as ethical issues security and privacy quality control accreditation and sustainability issues and cultural issues *Adaptive and Adaptable Learning* Katrien Verbert, Mike Sharples, Tomaž Klobučar, 2016-09-06 This book constitutes the proceedings of the 11th European Conference on Technology Enhanced Learning EC TEL 2016 held in Lyon France in September 2016 The 26 full papers 23 short papers 8 demo papers and 33 poster papers presented in this volume were carefully reviewed and selected from 148 submissions **Secondary Education in Ethiopia** Rajendra Joshi, Adriaan Verspoor, 2012-11-01 This book discusses reforms that should be undertaken in secondary education to support Ethiopia's transition from a low to middle income economy The most critical reform identified is the introduction of a flexible curriculum that serves the needs of all students including those who may not pursue
