OECD Economic Surveys: Brazil 2020 OECD, 2020-12-16. The COVID-19 pandemic has caused severe human suffering and triggered a deep recession in Brazil. Economic policies reacted in a timely and decisive manner to the crisis, supporting millions of Brazilians. But a strong and inclusive recovery from the recession will require long-lasting improvements in economic policies. Improving fiscal outcomes remains one of Brazil's principal challenges, given a high debt burden to which the pandemic has added significantly. Public spending will need to become more efficient, including by building on past progress in the fight against corruption and economic crimes. Social protection can be strengthened through a better focus on the most effective policies and benefits, which could allow significant reductions in inequality and poverty. Stronger growth will hinge on raising productivity, which has been virtually stagnant for decades. This requires addressing underlying policy challenges, including reducing regulatory burdens, reforming taxes, strengthening judicial efficiency, and fostering a stronger integration into the global economy. Raising productivity implies reallocations and structural changes in the economy, which should be accompanied by well-designed training and education policies. Training with a strong focus on local skill demand can help workers master the transition and seize new opportunities to move into better jobs.

Just Security in an Undergoverned World William J. Durch, Joris Larik, Richard Ponzio, 2018 Just Security in an Undergoverned World examines how humankind can manage global problems to achieve both security and justice in an age of antithesis Global connectivity is increasing visibly and invisibly in trade finance culture and information helping to spur economic growth technological advance and greater understanding and freedom but global disconnects are growing as well Ubiquitous electronics rely on high value minerals scraped from the earth by miners kept poor by corruption and war People abandon burning states for the often indifferent welcome of wealthier lands whose people in turn draw into themselves Humanity s very success underwritten in large part by lighting up gigatons of long buried carbon for 200 years now threatens humanity s future The global governance institutions established after World War Two to manage global threats especially the twin scourges of war and poverty have expanded in reach and impact while paradoxically losing the political support of their wealthiest and most powerful members Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in institutions This volume argues however that a properly mandated managed and modernized global architecture offers unparalleled potential to midwife solutions to vexing issues that transcend borders and capacities of individual actors from conflict and climate change to poverty and pandemic disease The volume offers just security as a new framework for evaluating innovative solutions and strategies for institutional reform **Essentials of Human Behavior** Elizabeth D. Creating Project-Based STEM Environments Jennifer Wilhelm, Ronald Wilhelm, Merry Cole, 2019-02-05. This book models project-based environments that are intentionally designed around the United States Common Core State Standards (CCSS) 2010 for Mathematics, the Next Generation Science Standards (NGSS) Lead States 2013 for Science, and the National Educational Technology Standards (ISTE) 2008. The primary purpose of this book is to reveal how middle school STEM classrooms can be purposefully designed for 21st Century learners and provide evidence regarding how situated learning experiences will result in more advanced learning. This Project Based Instruction (PBI) resource illustrates how to design and implement interdisciplinary project-based units based on the REAL Realistic Explorations in Astronomical Learning Unit 1 and CREATES Chemical Reactions Engineered to Address Thermal Energy Situations Unit 2. The content of the book details these two PBI units with authentic student work, explanations, and research behind each lesson, including misconceptions students might hold regarding STEM content, pre/post research results of unit implementation with over 40 teachers and thousands of students. In addition to these two units, there are chapters describing how to design one's own research-based PBI units, incorporating teacher commentaries regarding strategies, obstacles overcome, and successes as they designed and implemented their PBI units for the first time after learning how to create PBI STEM Environments the REAL way.
