The Hertzsprung-Russell Diagram

The H-R diagram is actually a graph that illustrates the relationship between the average surface temperature of stars and their absolute magnitude (how bright they would appear if they were all the same distance away from the viewer). The brightness of stars is affected not only by temperature but also by size. The brightest stars would be those that are large and hot. Those that are the least bright, or luminous, would be small and cool. The color of a star is determined by its surface temperature.

Using the Hertzsprung-Russell diagram above, answer the following questions.

1. What is the approximate surface temperature of our sun?
2. Which stars are the brightest? Why?
3. What is the absolute magnitude of the sun?
4. What is the color of the stars which have the lowest surface temperature?
5. Most of the stars shown in the diagram are classified as which type of star?
6. Which type of star is our sun?
7. What is the relationship between temperature and brightness for stars in the main sequence?
8. What group of stars are very hot but not very luminous?
9. What characteristics of a star are compared in the HR diagram?
10. How can red giants be classified as very bright when they are not very hot?

Earth Science ,2001 Art & Science J. Paul Getty Museum,2013-07-23 For the first time the award winning Education Department of the J Paul Getty Museum is making one of its much lauded K 12 curricula available nationwide in an attractive and inexpensive print format Art Science was developed by the Getty s expert educators scientists curators and conservators and tested by classroom teachers and it connects to national and California state standards Teachers and parents will find engaging lessons and activities divided into beginning intermediate and advanced levels for step by step learning Art Science mines the treasures of the Getty Museum to explore the many intersections of the visual arts with scientific disciplines Full color images of antiquities decorative arts drawings manuscripts painting photography and sculpture illuminate lesson plans about for example The laws of physics that keep a bronze sculpture of a juggler from tipping over The science that allows photographers to manipulate light and capture images on paper The processes of radiation and convection that turn clay into porcelain Scientific observation of the natural world as the subject for art How scientists removed 2 000 years of oxidation and encrustation to reveal a priceless ancient sculpture The curriculum also contains a trove of resources including handouts Questions for Teaching a timeline glossary and list of print and web sources for further research There are also links to additional related lessons and images available on the Getty website The full page color images and special lay flat binding of Art Science make it ideal for use with a digital document reader Authentic Learning Through Advances in Technologies Ting-Wen Chang,Ronghuai Huang,Kinshuk,2017-09-19 This book introduces the advanced technologies used for authentic learning an educational term that refers to a variety of techniques focusing on how students apply the skills and knowledge acquired in school in real world situations In the meanwhile it presents the latest trends and future developments in learning design learning environment and assessment for authentic learning using advances in technology this book discusses how technology supports authentic learning and what makes it effective *Teaching Big History* Richard B. Simon,2014-12-23 Big History is a new field on a grand scale it tells the story of the universe over time through a diverse range of disciplines that spans cosmology physics chemistry astronomy geology evolutionary biology anthropology and archaeology thereby reconciling traditional human history with environmental geography and natural history Weaving the myriad threads of evidence based human knowledge into a master narrative that stretches from the beginning of the universe to the present the Big History framework helps students make sense of their studies in all disciplines by illuminating the structures that underlie the universe and the connections among them Teaching Big History is a powerful analytic and pedagogical resource and serves as a comprehensive guide for teaching Big History as well for sharing ideas about the subject and planning a curriculum around it Readers are also given helpful advice about the administrative and organizational challenges of instituting a general education program constructed around Big History The book includes teaching materials examples and detailed sample exercises This book is also an engaging first hand account of how a group of professors built an entire Big

History general education curriculum for first year students demonstrating how this thoughtful integration of disciplines exemplifies liberal education at its best and illustrating how teaching and learning this incredible story can be transformative for professors and students alike

Lessons from the Local Group Kenneth Freeman, Bruce Elmegreen, David Block, Matthew Woolway, 2014-11-13 Our understanding of galaxy formation comes mostly from two sources sensitive observations at high angular resolution of the high redshift Universe where galaxies are observed to be forming and detailed observations of individual stars and clouds in the Local Group where telltale remnants from its formative time remain and similar processes operate at a low level today The current conference focusses on key aspects of the Local Group composed of the Milky Way Andromeda and Triangulum Spiral Galaxies the Large and Small Magellanic Cloud galaxies numerous dwarf and irregular galaxies and intergalactic gas Topics include the halo and thick disk of the Milky Way with its first stars and stellar streams the Milky Way bar bulge and outer edge interstellar dust and turbulence star formation processes and stellar scattering in spiral arms views through the infrared Eyes of the Spitzer Space Telescope globular clusters the Local Gould Belt stellar metallicities and elemental abundances the environment and black hole in the Milky Way nucleus orbits of the Magellanic Clouds and galaxy dwarfs interstellar dust and turbulence the outer disks and halos of the Andromeda and Triangulum galaxies ripples from a collision in Andromeda and arcs of carbon stars in the Triangulum and intergalactic clouds This volume also discusses surveys of planetary nebulae galaxy morphology at low and high redshift cosmic evolution of star and galaxy formation and gas accretion Lyman alpha emitting galaxies ultra low surface brightness imaging and more Readers are given a clear and comprehensive view of this wide range of topics written by specialists in each field This is the proceedings of an International Conference at the Seychelles archipelago in May 2014 on the occasion of the 60th birthday of David Block and the millionth base two birthday of Bruce Elmegreen *Thinking Physics for Teaching* C. Bernardini, C. Tarsitani, M. Vicentini, 2012-12-06 The research in Physics Education has to do with the search of solutions to the complex problem of how to improve the learning and teaching of physics The complexity of the problem lies in the different fields of knowledge that need to be considered in the research In fact besides the disciplinary knowledge in physics which must be considered from the conceptual the historical and the epistemological framework one has to take into account some basic knowledge in the context of psychology and the cognitive sciences for the general and contextual aspects of learning and some basic knowledge in education and communication for what concerns teaching skills and strategies Looking back at the historical development of the research one may recognize that the complexity of the endeavour was not clear at first but became clear in its development which shifted the focus of the research in the course of time from physics to learning to teaching We may say that the research started more than 30 years ago with a focus on disciplinary knowledge Physicists in different parts of the western world after research work in some field of physics decided to concentrate on the didactical communication of physical knowledge *Magnetic Fields Across the Hertzsprung-Russell Diagram* Gautier Mathys, Sami K.

Solanki,Dayal T. Wickramasinghe,2001 **Scientific and Technical Aerospace Reports** ,1991 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database *Discovering the Cosmos* Robert C. Bless,1996 This text has two objectives to describe the leading ideas and concepts of modern astronomy and to indicate how astronomy in particular and physical science in general developed what its methods are its goals and its limitations Encyclopedia of Space and Astronomy Joseph A. Angelo,2014-05-14 Presents a comprehensive reference to astronomy and space exploration with articles on space technology astronauts stars planets key theories and laws and more

If you ally craving such a referred **Hertzsprung Russell Diagram Lesson Plan** book that will manage to pay for you worth, get the totally best seller from us currently from several preferred authors.
