LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module of the virtual lab.

MODULE 1: Introduction

At the beginning of the virtual lab, you were asked to select eight lizards from a category. What criteria did you use to select your lizards?

They were all green and had a similar shape.

Did your lizards grow similar? Were they?

Yes, they all grew to the same size. I thought about choosing lizards that were all the same color, but I chose lizards that were all the same shape and size.

An adaptation is a structure or function that the organism has as a population because it increases the ability to survive and reproduce in a particular environment. Provide one example and an explanation of an adaptation of the lizard you chose.

The lizards I chose were all green. This is an adaptation because it helps them blend in with the background and avoid being eaten.

Provide one evolutionary explanation for why lizards that are green are still alive today (i.e., they grew) would have survived a transformation.

Because the lizards were all green, they were able to blend in with the background and avoid being eaten by predators.
