Eugene Garfield 1925-2017

Antonella De Robbio,Raman Nair R,2017-04-01 Garfield s greatest contribution to science was the Science Citation Index SCI

It is a system that used to chart connections between pieces of scientific literature. It is not only an intellectual achievement but also an information engineering marvel covering millions of records from numerous subject fields and communicated over worldwide networks. These databases became the foundation of the online research tool called the Web of Knowledge. And it has now become accessible electronically via the Web of Science. Garfield enabled information retrieval to scale up, basically creating the entire information science field as we know it today. His life and work will surely inspire generations of scientists in advancing the frontiers of human knowledge. This is Informatics Studies 4.2, which is the Eugene Garfield Memorial Issue. It gives a bird's eye view of Garfield's life and work and consists of an 80-page interview of Garfield published in print for the first time, presenting his views on the impact of information systems in scientific research, NGOs, the future of Open Access, current research, and Big science, which can guide academic administrators, science policy makers in governments, and scientists.

Managing Scientific Information and Research Data Svetla Baykoucheva, 2015-07-14. Innovative technologies are changing the way research is performed, preserved, and communicated. Managing Scientific Information and Research Data explores how these technologies are used and provides detailed analysis of the approaches and tools developed to manage scientific information and data. Following an introduction, the book is then divided into 15 chapters discussing the changes in scientific communication, new models of publishing and peer review, ethics in scientific communication, preservation of data, discovery tools, discipline-specific practices of researchers for gathering and using scientific information, academic social networks, bibliographic management tools, information literacy, and the information needs of students and researchers, the involvement of academic libraries in eScience, and the new opportunities it presents to librarians, and interviews with experts in scientific information and publishing. Promotes innovative technologies for creating, sharing, and managing scientific content. Presents new models of scientific publishing, peer review, and dissemination of information. Serves as a practical guide for researchers, students, and librarians on how to discover, filter, and manage scientific information. Advocates for the adoption of unique author identifiers such as ORCID and ResearcherID. Looks into new tools that make scientific information easy to discover and manage. Shows what eScience is and why it is becoming a priority for academic libraries. Demonstrates how Electronic Laboratory Notebooks can be used to record, store, share, and manage research data. Shows how social media and the new area of Altmetrics increase researchers' visibility and measure attention to their research. Directs to sources for datasets. Provides directions on choosing and using bibliographic management tools. Critically examines the metrics used to evaluate research impact. Aids strategic thinking and informs decision making.
