

HUMAN ANATOMY

LABORATORY GUIDE AND DISSECTION MANUAL

MICHAEL J. TIMMONS RALPH T. HUTCHINGS

Cat Dissection • Protected Cadavers
Laboratory Models • Isolated Organs • Histology

This manual uniquely combines the features of a traditional anatomy laboratory text with those of a dissection manual and an anatomical atlas. It's unparalleled art program includes photos and illustrations, accompanied by observation instructions, of a wide range of specimens including cats, protected cadavers, isolated organs, histology slides and laboratory models. An easy-to-use icon system allows students and instructors to quickly find the sections dealing with appropriate specimens.

Additional pedagogy includes space for students to draw or take notes, unlabeled photographs and illustrations for students to label or color, and lists of all anatomical structures by body system. Finally, optional links to text content and images in *Martini/Thomson HUMAN ANATOMY 4/E* make this manual an ideal companion to that text, though it can easily be used in conjunction with any anatomy textbook.
