Fixing the Euro Within the National Constitutional Guardrails Frederik Behre, 2023-07-14 EU fiscal integration is indispensable to establishing a stable single currency in the long run However this integration is proving ever more difficult in light of increasing national constitutional opposition The author of this groundbreaking book shows that this dilemma between EU fiscal integration and national constitutional limits can be refuted He provides a structured comparative overview and outlook on how the available national constitutional space can be adapted to the political aspirations aiming at implementing EU fiscal integration steps while at the same time effectively protecting the national constitutional values at stake Beginning with a macro comparative assessment of Finland and Germany two countries which have comprehensively dealt with Eurocrisis issues in largely contrasting constitutional ways and continuing with a comparative assessment of the specific French German Polish and Spanish constitutional identity limits EU fiscal integration steps are tested against the charted national constitutional space to determine their attainability The resulting overview identifies best practices that can be employed to locate constitutional space for EU fiscal integration while enhancing the protection of core constitutional principles The analysis addresses such specific areas as the following constitutional red line limits vs flexible or mutable constitutional approaches to EU fiscal integration strict constitutional identity limits that formulate obstacles to the attainment of EU fiscal integration how national constitutional authorities perceive and portray the EU in their respective approaches integration measures as an increase in the impact of sovereign powers vs loss of autonomous decision making application of national constitutional frameworks during the Eurocrisis ex ante constitutional review and ex post judicial scrutiny in representative Member States national budgetary responsibility and fiscal autonomy emergency budgetary instruments and funding options for fiscal integration The analysis throughout highlights the important role EU integration plays in stabilizing core national constitutional values in light of such complex challenges as the COVID 19 pandemic the current Russian war of aggression against Ukraine and the required common defence strategies but also climate change and digitalization In its innovative response to the urgent challenge of feasible EMU reforms to stabilize the euro this book displays how national constitutional systems can address EU fiscal integration in

a more flexible and yet more effective manner how EU integration steps can engage with national constitutional concerns in a more structured manner as well as specifically how national parliaments can be integrated and play a decisive role even when budgetary and fiscal powers are conferred at the EU level thereby identifying a future model for EU cooperation in politically important competence areas. It thus offers a constructive outlook on achievable fiscal integration steps which will prove of inestimable value to lawyers, judges and policymakers at the national and EU levels. Advanced catalytic materials and technologies in biomass conversion Xianxiang Liu, Pau Loke Show, Haiyan Xia, Jun Yue, 2023-04-06 *Innovations in Computational Intelligence* Brajendra Panda, Sudeep Sharma, Usha Batra, 2017-11-02. The present book includes a set of selected best papers from the 3rd International Conference on Recent Developments in Science Engineering and Technology REDSET 2016 held in Gurgaon India from 21 to 22 October 2016. The conference focused on the experimental, theoretical and application aspects of innovations in computational intelligence and provided a platform for the academicians and scientists. This book provides an insight into ongoing research and future directions in this novel, continuously evolving field. Many decades have been devoted to creating and refining methods and tools for computational intelligence such as Artificial Neural Networks, Evolutionary Computation, Fuzzy Logic, Computational Swarm Intelligence and Artificial Immune Systems. However, their applications have not yet been broadly disseminated. Computational intelligence can be used to provide solutions to many real-life problems which could be translated into binary languages allowing computers to process them. These problems, which involve various fields such as robotics, bioinformatics, computational biology, gene expression, cancer classification, protein function prediction etc, could potentially be solved using computational intelligence techniques.

Competition Law Günter Hirsch, 2008. This text covers the area of entertainment and broadcasting with explanation of the law and discussion of its practical application in the media world. It covers areas such as entertainment contracts, broadcasting regulation and disputes.
