Boklit Ely Roque Sagansay, 2020-01-09 *Boklit* is a story of Ely's life from his childhood until he was captured by God in a violent near death experience under the hands of gangsters. *Boklit* grew up in poverty with an abusive father. He desired to kill his dad at a very young age. *Boklit* became violent and was already in drugs, sex, smoking, and booze at the age of twelve. He became wanted by the law when he was a teenager. Find out more about his life in this inspiring book. *Boklit* His life-changing testimony was featured on 700 Club Asia. Walwal The Ely Sagansay Story

Suicide Emile Durkheim, 2005-08-04 There would be no need for sociology if everyone understood the social frameworks within which we operate. That we do have a connection to the larger picture is largely thanks to the pioneering thinker Emile Durkheim. He recognized that if anything can explain how we as individuals relate to society, then it is suicide. Why does it happen? What goes wrong? Why is it more common in some places than others? In seeking answers to these questions, Durkheim wrote a work that has fascinated, challenged, and informed its readers for over a hundred years. Far-sighted and trail-blazing in its conclusions, *Suicide* makes an immense contribution to our understanding of what must surely be one of the least understandable of acts. A brilliant study, it is regarded as one of the most important books Durkheim ever wrote.

Suicide Jon Klimo, Pamela Rae Heath, 2006-06-12 This provocative study explores what happens to those who commit suicide. Drawing on communications from the spirits of more than 100 successful suicides, it offers an intriguing look at what the dead themselves say about suicide, its repercussions, and their experiences in the afterlife. Bringing together the channeled messages of three types of suicide: traditional suicide, assisted suicide, and the suicide mass murder adopted by terrorists, the book covers a wide range of topics, including why people commit suicide, what it is like to cross over, adjustment problems, what suicides would say to those left behind, and what they would tell others thinking of taking their own lives. Additionally, the book conveys powerful messages from suicide bombers warning potential terrorists of the serious karmic consequences that await them. For anyone contemplating suicide or euthanasia, the book offers profound, sometimes unsettling insight into the ramifications of these acts.

Durkheim and Postmodern Culture Stjepan Mestrovic, 2017-09-29 The present work is an elaboration of the author's previous efforts in *Emile Durkheim and the Reformation of Sociology* (1988) and *The Coming Fin de Sicle* (1991) to demonstrate Durkheim's neglected relevance to the postmodern discourse. The aims include finding affinities between our fin de sicle and Durkheim's fin de sicle and connecting the contemporary themes of rebellion against Enlightenment narratives found in postmodern culture with similar concerns found in Durkheim's sociology as well as in his fin de sicle culture, contributing to Durkheimian scholarship as well as to the postmodern discourse. The distinctive aspects of the present study flow from the focus on culture, communication, and the feminine voice in culture. Durkheim is approached as a fin de sicle student of culture, and his insights are applied to our fin de sicle culture. Furthermore, because Durkheim claimed that culture is comprised primarily of collective representations, he was a forerunner of the current postmodern concerns with communication. Because

Durkheim shall be read in the context of his fin de siècle this book shall lead to the conclusion that Durkheim was a kind of psychoanalyst such that society is the patient culture comprises the symptoms and the sociologist must decipher decode and even deconstruct collective representations Yet the Durkheimian deconstruction proposed here is unlike the postmodern deconstructions which criticize and tear apart a text without substituting a better meaning or interpretation Postmodern discourse has made respectable again the synthesis of multidisciplinary insights that was fashionable in Durkheim's fin de siècle In following this postmodern strategy this book is more than a book about Durkheim It is also a book about his contemporaries among them Carl Gustav Jung Thorstein Veblen Henry Adams Georg Simmel and Max Weber The author does not follow the postmodern strategy completely because he follows

Tricky Design Tom Fisher, Lorraine Gamman, 2018-12-13 *Tricky Design* responds to the burgeoning of scholarly interest in the cultural meanings of objects by addressing the moral complexity of certain designed objects and systems The volume brings together leading international designers scholars and critics to explore some of the ways in which the practice of design and its outcomes can have a dark side even when the intention is to design for the public good Considering a range of designed objects and relationships including guns eyewear assisted suicide kits anti rape devices passports and prisons the contributors offer a view of design as both progressive and problematic able to propose new material and human relationships yet also constrained by social norms and ideology This contradictory tricky quality of design is explored in the editors introduction which positions the objects systems services and things discussed in the book in relation to the idea of the trickster that occurs in anthropological literature as well as in classical thought discussing design interventions that have positive and negative ethical consequences These will include objects both material and immaterial systems with both local and global scope and also different processes of designing This important new volume brings a fresh perspective to the complex nature of things and makes a truly original contribution to debates in design ethics design philosophy and material culture

A History of Catholic Moral Theology in the Twentieth Century James F. Keenan, 2010-01-17 This is an

historical survey of 20th Century Roman Catholic Theological Ethics also known as moral theology The thesis is that only through historical investigation can we really understand how the most conservative and negative field in Catholic theology at the beginning of the 20th could become by the end of the 20th century the most innovative one The 20th century begins with moral manuals being translated into the vernacular After examining the manuals of Thomas Slater and Henry Davis Keenan then turns to three works and a crowning synthesis of innovation all developed before during and soon after the Second World War The first by Odon Lottin asks whether moral theology is adequately historical Fritz Tillmann asks whether it s adequately biblical and Gerard Gilleman whether it s adequately spiritual Bernard Haering integrates these contributions into his Law of Christ Of course people like Gerald Kelly and John Ford in the US are like a few moralists elsewhere classical gate keepers censoring innovation But with Humanae vitae and successive encyclicals bishops and popes reject the direction of moral theologians At the same time moral theologians like Josef Fuchs ask whether the locus of moral truth is in continuous universal teachings of the magisterium or in the moral judgment of the informed conscience In their move toward a deeper appreciation of their field as forming consciences they turn more deeply to local experience where they continue their work of innovation Each continent subsequently gives rise to their own respondents In Europe they speak of autonomy and personalism in Latin America liberation theology in North America Feminism and Black Catholic theology and in Asia and Africa a deep post colonial interculturatism At the end I assert that in its nature theological ethics is historical and innovative seeking moral truth for the conscience by looking to speak crossculturally
