The Transformation of University Institutional and Organizational Boundaries Emilia Primeri, Emanuela Reale, 2015-11-02 An emerging issue in higher education studies is that of boundaries crossing This is the main topic of the book The transformation of University institutional and organizational boundaries Several signals of shifting boundaries can be envisaged in higher education and research institutions which could be

glimpsed through organizations the institutions and changes to the academic profession That of boundaries crossing in Higher Education is a complex and heterogeneous issue which characterizes scientific knowledge today and represents a key issue when looking at University transformations across contexts and policies instruments and practices The analysis of boundaries supplies interpretative frameworks for the interactions between the development of professions and disciplines as well as the relationships of the science with various parts of society such as state professionals and the market Fuelling further the discussion on HEIs transformations allows capturing changes in the function objectives and scope of higher education and research institutions the move beyond sectoral and disciplinary boundaries and the increasingly blurred boundaries of academic professions and of scientific work Public policies and HE reforms can push or impede the mentioned transformations but they can also derive from individual likelihood of moving in blurring spaces or from the transformations of the epistemic communities and the emergence of new fields and sectors Hence changes are there open to our observations
