Ecology and Management of Blackbirds (Icteridae) in North America George M. Linz, Michael L. Avery, Richard A. Dolbeer, 2017-09-19 Shortlisted for the 2018 TWS Wildlife Publication Awards in the edited book category The various species of new world blackbirds often intermingled in large foraging flocks and nighttime roosts collectively number in the hundreds of millions and are a dominant component of the natural and agricultural avifauna in North America today Because of their abundance conspicuous flocking behavior and feeding habits these species have often been in conflict with human endeavors The pioneering publications on blackbirds were by F E L Beal in 1900 and A A Allen in 1914 These seminal treatises laid the foundation for more than 1 000 descriptive and experimental studies on the life histories of blackbirds as well as their ecology and management in relation to agricultural damage and other conflicts such as

caused by large winter roosting congregations The wealth of information generated in over a century of research is found in disparate outlets that include government reports conference proceedings peer reviewed journals monographs and books For the first time Ecology and Management of Blackbirds Icteridae in North America summarizes and synthesizes this vast body of information on the biology and life histories of blackbirds and their conflicts with humans into a single volume for researchers wildlife managers agriculturists disease biologists ornithologists policy makers and the public The book reviews the life histories of red winged blackbirds yellow headed blackbirds common grackles and brown headed cowbirds It provides in depth coverage of the functional roles of blackbirds in natural and agricultural ecosystems In doing so this authoritative reference promotes the development of improved science based integrated management strategies to address conflicts when resolutions are needed MSP(R) Foundation Programme Management Courseware - English Van Haren
