Alberta Journal of Educational Research ,1985 *For the Learning of Mathematics* ,1997 *Proceedings of Mechanical Engineering Research Day 2017* Mohd Fadzli Bin Abdollah,Tee Boon Tuan,Mohd Azli Salim,Mohd Zaid Akop,Rainah Ismail,Haslinda Musa,2017-05-29 This e book is a compilation of papers presented at the Mechanical Engineering Research Day 2017 MERD 17 Melaka Malaysia on 30 March 2017 **Resources in Education** ,1992-08

The Australian Mathematics Teacher ,1985 *Multicultural Approaches in Math and Science* ,1998 **Federal Probation** ,1968 *Ethnic Groups in Conflict, Updated Edition With a New Preface* Donald L. Horowitz,2001-04-09

Drawing material from dozens of divided societies Donald L Horowitz constructs his theory of ethnic conflict relating ethnic affiliations to kinship and intergroup relations to the fear of domination A groundbreaking work when it was published in 1985 the book remains an original and powerfully argued comparative analysis of one of the most important forces in the contemporary world Research in Education ,1974 **The Armed Forces Covenant in action?** Great Britain: Parliament: House of Commons: Defence Committee,2013-07-18 A series of Ofsted inspections on Army Apprenticeships conducted in 2013 rated the overall effectiveness as good This was an improvement over the last inspection in 2009 rated as satisfactory now called requires improvement Some 28 per cent of Army recruits were less than 18 years of age Further information is needed on why the Army is so dependent on recruiting personnel under the age of 18 years compared to the other two Services and whether steps are being taken to reduce this dependency Of those recruited in 2012 3 5 per cent of the Army were rated at entry level 2 for literacy that of a 7 to 8 year old and 39 per cent had a literacy level of an eleven year old If as the MoD states it has to recruit personnel at whatever level of attainment is available then it should boost remedial action when recruitment entry standards are particularly low In light of changes brought about by Future Force 2020 it may be that recruiting personnel with higher levels of attainment would better meet the future needs of the Armed Forces Whilst the Committee recognises that some recruits may not be eager to take further academic exams the MoD should encourage more recruits to undertake English and Maths GCSEs which would stand them in good stead for future employment The MoD has carried out some useful pilot projects with paramedic training and should identify more potential projects to ensure that vital skills paid for by the MoD are not lost to the country **Applied Mechanics Reviews** ,1984 **New Directions in Elementary School Mathematics** Emma E. Holmes,1995 A new book that focuses on interactive teaching a new more effective technique for helping elementary school children learn mathematics KEY TOPICS It has an interactive teaching approach with its focus on reasoning problem solving and communicating has been proven effective with children at all levels of mathematics competence Coverage examines the use of models and children s intuitive understanding to help young learners develop mathematics concepts and learn problem solving procedures Includes a chapter devoted to using interactive teaching with children with special needs For educators in the field of mathematics ENC Focus ,1998 **Resources in**

Michael T. Hartney,2022-09-28 A critical revelatory examination of teachers unions rise and influence in American politics As most American labor organizations struggle for survival and relevance in the twenty first century teachers unions appear to be an exception Despite being all but nonexistent until the 1960s these unions are maintaining members assets and political influence As the COVID 19 epidemic has illustrated today s teachers unions are something greater than mere labor organizations they are primary influencers of American education policy How Policies Make Interest Groups examines the rise of these unions to their current place of influence in American politics Michael Hartney details how state and local governments adopted a new system of labor relations that subsidized and in turn strengthened the power of teachers unions as interest groups in American politics In doing so governments created a force in American politics an entrenched subsidized machine for membership recruitment political fundraising and electoral mobilization efforts that have informed elections and policymaking ever since Backed by original quantitative research from across the American educational landscape Hartney shows how American education policymaking and labor relations have combined to create some of the very voter blocs to which it currently answers How Policies Make Interest Groups is trenchant essential reading for anyone seeking to understand why some voices in American politics mean more than others **Restoring Opportunity** Greg J.

Duncan,Richard J. Murnane,2014-01-01 In this landmark volume Greg J Duncan and Richard J Murnane lay out a meticulously researched case showing how in a time of spiraling inequality strategically targeted interventions and supports can help schools significantly improve the life chances of low income children The authors offer a brilliant synthesis of recent research on inequality and its effects on families children and schools They describe the interplay of social and economic factors that has made it increasingly hard for schools to counteract the effects of inequality and that has created a widening wedge between low and high income students Restoring Opportunity provides detailed portraits of proven initiatives that are transforming the lives of low income children from prekindergarten through high school All of these programs are research tested and have demonstrated sustained effectiveness over time and at significant scale Together they offer a powerful vision of what good instruction in effective schools can look like The authors conclude by outlining the elements of a new agenda for education reform Restoring Opportunity is a crowning contribution from these two leading economists in the field of education and a passionate call to action on behalf of the young people on whom our nation s future depends Copublished with the Russell Sage Foundation Testing in American Schools United States.
