Doss, M.D., M.B.A.,Clinton E. Faulk, M.D.,Carrie A. McShane, M.D.,Matthew W. Wilson, M.D.,2016-12-12 Beyond Residency offers practical no nonsense advice about the business and economics of being a medical doctor Used as a textbook in the Business of Medicine Course at East Carolina University s Brody School of Medicine this edition is designed to work more broadly for other institutions teaching business of medicine courses and for new physicians starting out in practice Recalling his days in medical school Marc Lyles senior director of health care affairs for the Association of American Medical Colleges said Whenever we asked a business question we were always told Don t worry about that You need to learn the medical side before you worry about the business side He states that between 2003 and 2007 the majority of students were satisfied with their medical and clinical training However less than half felt that enough time was devoted to the practice of medicine especially to medical economics The Brody School of Medicine addresses that discrepancy offering its Business of Medicine Course as a fourth year elective and as a postgraduate class for students in the Department of Physical Medicine and Rehabilitation Topics addressed include time value of money contracts RVUs disability and life insurance and investment plans such as traditional IRAs and Roth IRAs In 2015 the Business of Medicine Course received a positive score of 4 68 5 94% for its value to medical students and Beyond Residency received a score of 3 89 4 97% for its effectiveness in teaching students the business of medicine Beyond Residency helps students to understand important yet under explored areas that will impact them as practicing physicians **The New Face of Evaluation and Management** Kellie Hall,2025-06-30 Physicians want to care for patients not spend their time documenting in an electronic medical record Physicians are always complaining about the amount of time they spend documenting patient care in support of medical billing through an evaluation and management coding system E M New guidelines were created to lessen the time a physician provider spends on documentation as many of the mandatory elements are no longer a requirement for calculating a code level Previously an E M evaluation and management note required documentation of history exam and medical decision making with required elements in each component to support a level for payment If an element was missing the level of service was not supported therefore the code was lowered resulting in a lower reimbursement for the physician provider The new guidelines eliminated the requirement of History and Exam as part of the calculation of a code level Yes an appropriate history and exam are required this supports good patient care but when

it comes to reimbursement they are no longer part of the picture The overall system is not difficult if time is taken to understand the elements and how they are applied in the documentation Documentation is a word game always has been the authors focus is to show what words to use to lessen the time but still convey the complexity of the patient s condition and how the physician provider determines a treatment plan which includes the risk to the patient to satisfy the Coding guidelines initiated by Medicare and American Medical Association This book evaluates the new guidelines and brings them into prospective so physicians providers coders can easily understand how to document and calculate the level of service for reimbursement This is not a cumbersome book or complicated but straight to the point The main goal of the book is to educate physicians nurses and coders on what documentation is really required and what has just become habit over the last 30 years
