National Patient Safety Goals Calculator, 2006: Tools to Assess Compliance, The Glenn D. Krasker, Jennifer Paugh, **Textbook of Medical Administration and Leadership** Erwin Loh, Paul W. Long, 2023-10-29 This textbook covers all general areas of knowledge required for a trainee generalist medical administrator and doctor undergoing training to be a medical administrator specialist. Chapters cover all the key topics on medical administration and leadership. Some of the key topics included are health systems and policy, health law, private health and insurance, health disaster planning, population and public health, health information and technology, and health economics and financial management. Medical practitioners of today are part of huge changes in medical practice as continuing developments are happening in biomedical sciences and clinical practice with new health priorities, rising expectations among patients and the public, and changing societal attitudes. Consequently, basic knowledge and skills while fundamentally important are not enough today on their own, and doctors thus need to demonstrate leadership combined with sound management skills to drive the necessary changes required to meet the challenges ahead. This book serves as an invaluable resource for a wide spectrum of physicians including specialists, clinician managers, and other health professionals as well as non-clinical managers working in health.
