**European Refugee Problems, 1959** Zellerbach Commission on the European Refugee Situation, 1959 The Commission arrived at three central conclusions 1 that the refugee problem in Europe must be treated as a collective Western responsibility 2 that while there would always be a refugee influx the problem of residual refugees in Europe could be solved by the same kind of concerted action that succeeded in resettling some 170 000 Hungarian refugees in under a year and 3 that much could be done to improve the reception of refugees arriving in the Free World to standardize eligibility procedures and to expedite the process of resettlement Introduction Identifying Hidden Needs K. Goffin, F. Lemke, U.

Koners, 2010-10-06 Too many new products fail New products which are hard to differentiate from existing products won't capture the customer's imagination The failure is due to a poor understanding of customers' needs Companies need to take a radical approach to identifying customers' real needs and this book demonstrates innovative ways to achieve this The Interaction Field Erich Joachimsthaler, 2020-09-15 Learn how the most successful businesses are creating value and igniting smart growth in a fast-paced competitive market Most businesses today focus on competition and disruption instead of collaboration participation and engagement They focus on transactions instead of interactions They seek to optimize or extract value rather than share it They build assets and thrive on enormous scale huge distribution networks and brand recognition But then along comes a rival that doesn't care much about your brand and your other assets and it either rushes past you or mows you down In The Interaction Field management expert and professor Erich Joachimsthaler explains that the only way to thrive in this environment is through the Interaction Field model Companies who embrace this model generate facilitate and benefit from data exchanges among multiple people and groups from customers and stakeholders but also from those you wouldn't expect to be in the mix like suppliers software developers regulators and even competitors And everyone in the field works together to solve big industry-wide or complex and unpredictable societal problems The future is going to be about creating value for everyone Businesses that solve immediate challenges of people today and also the major social and economic challenges of the future are the ones that will survive and grow Management Matters Philip Delves-Broughton, 2013-02-14 How did Bill Clinton get his party to take him seriously again after the sex scandal story broke Who was the manager behind Edmund Hillary's ascent of Mount Everest Why could taking a nap after lunch be your route to a more productive day This engaging and entertaining book takes a fresh honest approach and explores what it's really like to be a manager It addresses the kinds of issues managers face on a daily basis from prioritising their time and balancing a team to recruiting new staff and managing the numbers Written by Philip Delves Broughton FT journalist and bestselling author of What They Teach You at Harvard Business School this book is jam-packed with titillating case studies and anecdotes from the very best and worst managers including everyone from Bill Clinton and Mark Zuckerberg to Alex Ferguson and Roger Federer for most of us our days are more like splat the rat flailing at problems as they emerge hoping

that one good wallop does the trick but fearing that nothing is ever well and truly solved Management Matters Philip Delves Broughton **Forbes** ,2003 **Product Design and Sustainability** Jane Penty,2019-08-19 Whether it is the effects of climate change the avalanche of electronic and plastic waste or the substandard living and working conditions of billions of our fellow global citizens our ability to deal with unsustainability will define the twenty first century Given that most consumption is mediated through products and services the critical question for designers is How can we radically reshape these into tools for sustainable living As a guide and reference text Product Design and Sustainability provides design students practitioners and educators with the breadth and depth needed to integrate the most appropriate sustainable strategies into their practice It establishes the principles that underpin sustainability and introduces a diverse range of social economic and environmental design responses and tools available to designers The numerous real world examples illustrate how these strategies play out in different product sectors and reinforce the view that sustainability is the most positive opportunity and creative challenge facing designers today This book delivers a comprehensive guide to the principles of sustainability and how they apply to product design that can readily be integrated into curricula and design practice reveals many of the issues specific product sectors are facing and provides the depth and breadth needed for formulating and developing sustainable design strategies to address these issues empowers and inspires designers to engage with sustainability through its many examples and insightful interviews with practitioners is fully illustrated with over 300 photographs graphs and diagrams and supported by chapter summaries annotated further reading suggestions and a glossary *Defoaming* P.R. Garrett,2017-12-14 Reviews all known antifoam mechanisms and discusses the appropriate practical approaches for solving foam control problems in a variety of industrial contexts These range from crude oil production to detergent formulation **The Evolution of European Manufacturing Industries** Bolesław Domański,Grzegorz Micek,Robert Guzik,Krzysztof Gwosdz,Arkadiusz Kocaj,2024-08-29 The book provides a picture of the increasing significance of Central Europe and especially Poland in global production networks discussing the underlying economic social and political factors The key question it answers is to what extent the growth of production and exports results in industrial upgrading towards the manufacturing of more sophisticated high value added products new technologies and the development of non production functions especially design and advanced service capabilities The book shows that Central European manufacturing no longer exhibits the typical features of production activities in the periphery in particular low density and diversity low productivity narrow specialisation in low value added activities and poor local linkages hence limited local value creation and value capture There is still dependence on foreign controlled enterprises in several sectors and limited product innovation which remains a major weakness Further the book assesses the social consequences of the ongoing development of manufacturing capabilities in Poland and its impact on employment conditions including the quality of jobs and level of wages The authors provide insight into relationships between globalisation processes place specific

attributes and current economic policies and as such the book will be of interest to academics policy makers and other stakeholders interested in both peripheral economies and core countries and representing various international organisations dealing with economic transition and development
