

## Chemistry – Unit 6 Worksheet 1

After having observed molecular models which show 18.098 compounds, you discovered that certain particles are known to form positively charged ions, but cannot, while some particles are known to form negatively charged ions (anions). However, many atoms cannot make continuous particles, and a substance has been experimentally shown that it is made of particles which are not ions. After all, these examples are particles that exist that have been shown to have elements composed of particles that are charged off their own charge.

1. After that formula, what does the particle structure that shows composition. The name and ions are also composed of given.
