

DeltaV™ Control Network Hardware

- Easy to use
- Scalable and cost-effective
- Built-in network diagnostics
- Fully redundant network

The DeltaV Control Network is easy to install and maintain with the DeltaV Smart Switches.

Introduction

Your control network is the backbone of your system. The DeltaV Area Control Network (ACN) is a standard Ethernet network dedicated to the DeltaV system. You connect the DeltaV workstations and the controllers using the Control Network.

The Control Network is a dual speed 10/100BaseT network. CAT 5 screened (ScTP) twisted-pair cable connects each node to switch.

The DeltaV Control Network is an easy-to-design-and-implement dedicated Ethernet network. All DeltaV devices are connected to the same subnet and all of the network addressing (IP addresses) for DeltaV equipment is managed by the DeltaV system. The DeltaV "self-managed network" does not require the user to track network address usage.

The DeltaV system supports a specific set of network switches for the DeltaV ACN and the DeltaV Smart Switches (see the ordering information included in this document for details of the specific control network devices we support and the DeltaV Smart Switches).

Benefits

Easy to design and implement: As a dedicated network with predictable communications traffic, the DeltaV system has done all of the system testing so you only have to plug the components together to create the control network.

Plug-and-play components: You can expand the network easily; just plug in another workstation or controller and it is recognized by the system.

Standards compliance: Network components are compliant with standards such as IEEE, CE and CSA.

Network diagnostics: On the Smart Switches you can use software diagnostics to verify proper communication-line health. The LEDs on each individual switch provide health status information.

Scalable in small increments: The DeltaV system provides a package with very low initial cost. You are able to expand the system readily and economically by adding hardware incrementally to your system.

Redundant: The DeltaV ACN is a fully redundant communication network. Nodes may also be connected using a simplex network, but this is not a recommended practice.
