can use to identify a client's stuckpoints i.e. the faulty process that keeps clients from effectively solving their life problems. The reader is then provided with treatment maps for each of the most commonly presented stuckpoints and guidance on how to present clients with a preliminary treatment plan. Next, the author explains techniques for building rapport, changing the emotional climate, staying in lockstep, and repairing breaks in the process, and shows through transcribed sessions how to craft sessions to maximize their emotional and therapeutic impact. Finally, clinicians will learn how to apply these concepts and techniques to their established clinical model. With rich vignettes included throughout and end-of-chapter questions to invite the reader to reflect on their own practice and consolidate their knowledge of therapeutic processes, *Process Focused Therapy* will be a valuable guide for both beginning and experienced therapists.

Avoiding in-depth discussion of theoretical concepts, the authors instead provide practical principles and actionable steps for doing PBT, including case examples and exercises to facilitate a structured learning experience. Readers will come away with a fundamental understanding of PBT that will allow them to immediately begin incorporating the model into their own practice.
