Sergei Aleksandrovich Genkin,Dmitrii Vladimirovich Fomin, What kind of book is this It is a book produced by a remarkable cultural circumstance in the former Soviet Union which fostered the creation of groups of students teachers and mathematicians called mathematical circles The work is predicated on the idea that studying mathematics can generate the same enthusiasm as playing a team sport without necessarily being competitive This book is intended for both students and teachers who love mathematics and want to study its various branches beyond the limits of school curriculum Homework,

Learning and Academic Success: The Role of Family and Contextual Variables Antonio Valle,Susana Rodríguez,Pedro Rosário,Mar Lorenzo Moledo,2020-02-24 The main purpose of this Research Topic is to analyze and identify the main family and contextual variables that are involved in the process of carrying out homework This will require studying the role played by teachers students and families in order to ensure that schoolwork is a useful learning tool Although the role of the student is obviously crucial in homework research has focused on the cumulative time spent by the student carrying out homework However the time spent on homework is not in itself evidence of the student s involvement nor is time spent indicative of quality time Indeed an excess of time can sometimes denote low competence in a field of knowledge while spending less time on homework could be indicative of high competence It is more likely that a high dedication of time spent on homework reflects high motivation or comprehension deficits rather than commitment to learning or academic motivation In tandem with the role of the student teachers as responsible for prescribing homework assignments for students also become central

players in the process of completing homework assignments The decisions that teachers make about homework prescriptions and the amount and type of tasks they set will determine to a large extent the quality of the homework process including the student's motivation and the student's level of engagement with homework Furthermore the fact that homework is useful interesting and motivating for students will depend on how the teacher prescribes those tasks and the connection established with classroom learning Teacher feedback also acquires particular relevance for this point by helping the students to accurately estimate the quality of their progress and overcome the difficulties they may have encountered in carrying out their homework Lastly the effectiveness of teacher feedback depends on its contribution to the student's educational progress and how that student will perform in the future In addition to the student who performs the task and the teacher who prescribes and corrects it we must not lose sight of parents' role Although there are discrepancies regarding the role that parents play in relation to homework it is evident that their implication has important consequences not only on the final result of those tasks but also on the very process of carrying them out Everything seems to indicate that the family environment and more specifically the support and feedback provided by parents is a factor that can determine the involvement of students in school duties In this way providing emotional support encouraging children to get involved can contribute positively to improving their motivation and interest in the performance of homework The objective of this Research Topic is to provide researchers and professionals in psychology and education settings with some of the most recent empirical evidence regarding the homework process its prescription and correction Overall we aim to cease making homework a source of conflict and controversy at the socio educational level in order to provide useful instruments for improving the quality of student learning This work was developed with the financing of the research projects EDU2013 44062 P MINECO EDU2017 82984 P MEIC

**Connecting Leadership with Learning** Michael A. Coplan, Michael S. Knapp, 2006-10-15 What kind of leadership makes learning possible for all students How can school leaders help teachers

increase their knowledge and improve their instructional abilities What actions should leaders take to ensure that learning occurs In *Connecting Leadership with Learning A Framework for Reflection Planning and Action* Michael A Copland and Michael S Knapp give educational leaders a new way to answer these questions and find solutions perfect for their particular school environment Copland and Knapp assert that far too many educational leaders are struggling with outdated curricula demands that don't align with their school or district goals and professional meetings that are high on complaints but low on solutions Instead of prescribing a linear or rigid approach the authors encourage educators to be attentive and tune into their leadership actions by using the Leading for Learning Framework The framework provides different vantage points to help leaders reflect on their strengths and weaknesses plan for improvement and take actions to foster learning for students teachers and professionals and school and district leaders The Leading for Learning Framework will empower leaders to Establish a focus on equitable learning Build professional communities Engage communities and external partnerships Act strategically and share leadership Create coherence in their leadership actions The book includes extended case studies descriptions of 23 different leadership pathways and many examples from schools and districts that show the Leading for Learning Framework in action There is no magic formula for great school leadership but Copland and Knapp conclude that magic can happen when leaders reframe their efforts to focus more clearly on learning

Unschooling To University Judy L. Arnall, 2018-09-21 School is one option for education homeschooling is the second and unschooling is the third Many parents are frustrated by the school system perhaps because of bullying crowded classrooms and outdated dull online courses Disengaged learners that have no say in their coerced curriculum tend to act out tune out or drop out Education must change and unschooling is the fastest growing alternative method of learning Two decades ago students registered with their local school based on their house address Now with the internet students are borderless Learning can occur anywhere anytime anyway and from anyone including self taught Self directing their education unschoolers learn through Play Projects Reading Volunteering Video games Sports Mentorship Travel Life This book explores the path of 30 unschooled children who self directed all or part of their education and were accepted by universities colleges and other postsecondary schools Most have already graduated What children need most are close relationships parents teachers siblings relatives coaches and mentors within a wider community not just within an institutional school Educational content is everywhere Caring relationships are not Families that embrace unschooling do not have to choose between a quality education and a relaxed connected family lifestyle They can have both
