

Essay With Counter Argument

QUESTION:

Do you agree or disagree with the following statement? It is more important for students to understand ideas and concepts than it is for them to learn facts. Use specific reasons and examples to support your answer.

Sample answer:

We live in an increasingly complex world, an Information Age. In this era where knowledge is key to survival, learning facts is very important, as is learning ideas and concepts. I would argue that learning ideas and concepts is at least slightly more important than learning facts.

Ideas and concepts are especially important in formal education. The classroom style of learning requires certain study skills. These study skills are useful tools for learning facts, but the skills are not necessarily natural. The skills themselves must be learned. Students must “learn to learn,” learning the ideas and concepts behind education. Without first learning these ideas and concepts, they won’t be able to learn facts very effectively. So learning ideas and concepts is more important. Ideas and concepts are foundational to the learning of facts.

The purpose of school is to prepare students for full participation in society. To hold down jobs and be part of a community, learners need ideas and concepts even more than they need facts. If someone studies to become an airplane pilot for example, it’s not enough to learn where all the controls are in an airplane and what they do. Airline pilots should have an idea of what it feels like to be in a plane before they can actually be trusted to fly a real airplane. Similarly, for doctors concepts such as safety, responsibility, and bedside manner are more important than knowing every single medical fact there is to know.

Certainly, it is also very important to learn facts, which is why some would argue facts are the most important thing to learn. Using the pilot and doctor example again, no one would want a pilot or doctor who learned far fewer facts than their classmates when they were in school. But while facts are important, it is skills and concepts that allow us to truly use facts. There is an expression “Give a man a fish and he will eat for a day. Teach a man to fish, and he will eat for a lifetime.” The facts teachers give students are like the fish. The skills and concepts are like the fishing—students need them to eventually leave school and learn on their own.
