MicroStrategy Product Manuals Staff, MicroStrategy Product Manuals, 2011-12-20 **User's Guide**, 1992 *Airport Passenger Terminal Planning and Design: Spreadsheet models and user's guide* Landrum & Brown, 2010 TRB's Airport Cooperative Research Program ACRP Report 25 Airport Passenger Terminal Planning and Design comprises a guidebook, spreadsheet models, and a user's guide in two volumes and a CD-ROM intended to provide guidance in planning and developing airport passenger terminals and to assist users in analyzing common issues related to airport terminal planning and design. Volume 1 of ACRP Report 25 explores the passenger terminal planning process and provides in a single reference document the important criteria and requirements needed to help address emerging trends and develop potential solutions for airport passenger terminals. Volume 2 addresses the airside terminal building and landside components of the terminal complex. Volume 2 of ACRP Report 25 consists of a CD-ROM containing 11 spreadsheet models which include practical learning exercises and several airport-specific sample data sets to assist users in determining appropriate model inputs for their situations and a user's guide to assist the user in the correct use of each model. The models on the CD-ROM include such aspects of terminal planning as design hour determination, gate demand, check-in, and passenger and baggage screening, which require complex analyses to support planning decisions. The CD-ROM is also available for download from TRB's website as an ISO image.

A User's Guide to the Technical Training Schoolhouse Model Thomas Manacapilli, Bart Bennett, 2006. In 2002 RAND Project AIR FORCE studied the data systems used by the Air Education and Training Command AETC to manage training costs and capacities. The schoolhouse model developed to inform policy decisions regarding technical training pipeline issues grew out of this study. The model examines resources used and training limitations encountered during the execution of a training program. At the same time the AETC Studies and Analysis Squadron SAS built a similar set of planning and execution assessment tools. RAND and AETC SAS agreed to combine the schoolhouse portion of their efforts into one model. The purpose of this report is to provide front-end users of the schoolhouse model with a reference for collecting and implementing data; it also briefly describes the simulation model and its uses. The model is potentially useful for evaluating changes in production and resources, highlighting resource bottlenecks, providing insight into classroom details such as empty seats and the rate of individuals who prove ineffective in training, and changes in production resulting from changes in resources, course syllabi, and washback and attrition rates.
