Symmetries of Maxwell's Equations W.I. Fushchich, A.G. Nikitin, 1987-07-31 Approach your problems from the right end It isn't that they can't see the solution It is and begin with the answers Then one day that they can't see the problem perhaps you will find the final question G K Chesterton The Scandal of Father The Hermit Oad in Crane Feathers in R Brown The point of a Pin van Guik's The Chinese Maze Murders Growing specialization and diversification have brought a host of monographs and textbooks on increasingly specialized topics However the tree of knowledge of mathematics and related fields does not grow only by putting forth new branches It also happens quite often in fact that branches which were thought to be completely disparate are suddenly seen to be related Further the kind and level of sophistication of mathematics applied in various sciences has changed drastically in recent years measure theory is used non trivially in regional and theoretical economics algebraic geometry interacts with physics the Minkowsky lemma coding theory and the structure of water meet one another in packing and covering theory quantum fields crystal defects and mathematical programming profit from homotopy theory Lie algebras are relevant to filtering and prediction and electrical engineering can use Stein spaces And in addition to this there are such new emerging subdisciplines as experimental mathematics CFD completely integrable systems chaos synergetics and large scale order which are almost impossible to fit into the existing classification schemes They draw upon widely different sections of mathematics

Functionals of Multidimensional Diffusions with Applications to Finance Jan Baldeaux, Eckhard Platen, 2013-08-13 This research monograph provides an introduction to tractable multidimensional diffusion models where transition densities Laplace transforms Fourier transforms fundamental solutions or functionals can be obtained in explicit form The book also provides an introduction to the use of Lie symmetry group methods for diffusions which allows to compute a wide range of functionals Besides the well known methodology on affine diffusions it presents a novel approach to affine processes with applications in finance Numerical methods including Monte Carlo and quadrature methods are discussed together with supporting material on stochastic processes Applications in finance for instance on credit risk and credit valuation adjustment are included in the book The functionals of multidimensional diffusions analyzed in this book are significant for many areas of application beyond finance The book is aimed at a wide readership and develops an intuitive and rigorous understanding of the mathematics underlying the derivation of explicit formulas for functionals of multidimensional diffusions
