Hooper,Alex K. and ancillary testing in postmortem examinations to serve the needs of today's patient populations. As resident education is re-examined by pathology and education authorities, new competency-based training models will almost certainly come to the fore. A chapter will examine approaches to the future training of medical students, residents and fellows in an environment of changing autopsy exposure. A final chapter will summarize the vision for the autopsy as a clinical outcome measure and valuable scientific resource. This book will be a new type of volume in the field of autopsy pathology. It differs from the presently available review, references and atlases in that it provides guidance for readers to embrace transformations that are already taking place in the field. There currently is no resource that offers comprehensive guidance for modern autopsy practice and looks forward to what the field might become in the future.

**When Justice Is a Game** MaDonna Maidment,2021-01-10T00:00:00Z All too often the police do not get the right person Wrongful convictions are framed as mistakes or failures of the justice system However many of the wrongfully convicted are from among the poor and visible minority groups The law then becomes an ideological mask relieving us of the responsibility of engaging with the real issues that underscore wrongful convictions MaDonna Maidment illustrates how the desire to get a conviction and paint the police and the courts in a positive light often means that false evidence and court decisions based on prejudice and racism lead to innocent people being convicted The official version of the law says Maidment despite its claims of impartiality neutrality and objectivity is a tool of the state and its elite club members designed to maintain the illegitimate domination of society Turning back to the very system that got it wrong in the first place therefore should be a non starter
