The Internet: A Great Invention

INTRODUCTION

The Internet has changed the way we live. It started as something that we could access only through a computer, but nowadays it is everywhere, and I love it!

ONE THING I LIKE *find answers*

One of the cool things about the world wide web is that you can look up anything you want and find out the answer straight away. Isn't that fantastic? For example, imagine you are arguing with your friends about how to do something. Easy solution: go online and find the answer!

WHAT I LIKE BEST *learn stuff cheaply & RECOMMENDATION www.udemy.com*

However, the greatest thing about the Internet is how you can learn tons of things very cheaply or even for free! In fact, my favourite website is www.udemy.com, where people register to teach and learn about different things: music, website design, making apps, history, etc. So I totally recommend it to everyone!

CONCLUSION

In conclusion, the Internet has a lot of great things. For me, the best are finding information and learning online. What about you? What are your favourite things about it?

Writing Scientific Research Articles Margaret Cargill, Patrick O'Connor, 2011-09-13 Margaret Cargill's background as a linguist and research communications educator and Patrick O'Connor's experience as both research scientist and educator synergize to improve both the science and art of scientific writing. If the authors' goal is to give scientists the tools to write and publish compelling well-documented clear narratives that convey their work honestly and in proper context, they have succeeded admirably. *Veterinary Pathology* July 2009. The book is clearly written, has a logical step-by-step structure, is easy to read, and contains a lot of sensible advice about how to get scientific work published in international journals. The book is a most useful addition to the literature covering scientific writing. *Aquaculture International* April 2009. Writing Scientific Research Articles: Strategy and Steps guides authors in how to write as well as what to write to improve their chances of having their articles accepted for publication in international peer-reviewed journals. The book is designed for scientists who use English as a first or an additional language for research students and those who teach them paper-writing skills and for early career researchers wanting to hone their skills as authors and mentors. It provides clear processes for selecting target journals and writing each section of a manuscript, starting with the results. The stepwise learning process uses practical exercises to develop writing and data presentation skills through analysis of well-written example papers. Strategies are presented for responding to referee comments as well as ideas for developing discipline-specific English language skills for manuscript writing. The book is designed for use by individuals or in a class setting. Visit the companion site at www.writeresearch.com.au for more information.

Academic English : Writing a research article Catherine Verguts, 2021-12-16. Are you a doctoral student or a researcher in the field of Social and Behavioural Sciences? Would you like to present your research in a well-structured and readable manner? This book shows you how to make sure your article receives the attention it deserves. Advanced Academic English: Writing a Research Article addresses the following questions: How can I acquire an academic writing style? How can I develop an elaborate and accurate academic vocabulary? How can I integrate the literature into my paper? How can I structure an introduction? How can I present my results clearly and concisely? How can I interpret and evaluate my data in relation to the problem at hand? How can I write a concise but self-explanatory abstract? You can find an answer to these questions by doing a variety of task-based and process-based learning activities such as filling in the gaps, rewriting sentences and paragraphs, and offering peer feedback. Several language focus sections deal with grammar topics related to the writing process of a research article. Moreover, the reference pages offer detailed background information and field-specific examples.
