 dealing with some topical aspect of science and technology policy Past examples have included the 20th anniversary meeting  
 of the establish ment of the Science Committee in 1978 which made a review of the achieve ments of the various  
 programmes It proved to be a valuable opportunity to take stock of the impact of science and technology on Western  
 societies and was a particularly useful occasion for a critical analysis of the changing nature and social role of science and  
 technology In contrast the Science Committee Conferences in 1973 and 1976 on the Technology of Efficient Energy  
 Utilization and on Thermal Energy Storage were responses of the Committee to specific technological problems engendered  
 by the then acute energy supply position A similar technologically oriented study was made in 1975 of the Rational Use of
