The 70 revised full papers presented were carefully reviewed and selected. But buyer beware! A used car is likely to need more repairs and may come with a short warranty or none at all. In addition, used cars may lack the latest safety features. That is why it is so important for consumers to do extensive research so they can avoid all of the potential pitfalls of buying a used car. The auto experts at Consumer Reports have done the work for you and have compiled their extensive research and report their findings into the 2007 edition of USED CAR BUYING GUIDE. This fabulous tool will help steer any consumer who is in the market for a used car towards the better performing and more reliable used car models and away from those models with a troubled past or substandard performance. Before consumers set foot on a used car lot, they should read all the valuable information provided in this book so they can be armed with as much information as possible and the knowledge to make an educated choice. Consumer Reports knows cars and offers the most detailed and revealing used car reliability information available anywhere, including Unbiased reviews of every major model from 1999-2006, Lists of the best and worst used vehicles and how to avoid a lemon, A checklist of what to look for when inspecting a used car, Best used cars for gas mileage, Tips on negotiating the best price, Reliability recalls and crash test information, Making sense of safety information, How to get the most money when trading in your current car. The majority of this book is devoted to the profiles of 264 cars, minivans, SUVs and trucks, presenting all major 1999-2006 models. Each profile contains a photo from the representative year, a write-up of the vehicle's reliability history, crash test data and the model years when key safety gear was added and when a major redesign was made. **The Climate Diet** Jonathan Harrington, 2012-05-04 The atmosphere is getting fat on our carbon and other greenhouse gas emissions and it needs our help. We live in a world of excess, consuming too much of everything: food, clothes, cars, toys, shoes, bricks and mortar. Our bingeing is often so extreme that it threatens our own health and wellbeing. And we are not the only ones who are getting sick. The Earth, which provides the food, air, water and land that sustains us, is also under severe pressure. We either take steps to put our personal and planetary systems back into balance or we suffer the consequences. So what does any unhealthy, overweight person do when the doctor tells him or her that they are eating themselves into an early grave? Go on a diet. This is the must-have guide to the most important diet ever explaining climate
