Bandt,Siegfried Graf,Martina Zähle,2012-12-06 The second conference on Fractal Geometry and Stochastics was held at Greifs wald Koserow Germany from August 28 to September 2 1998 Four years had passed after the first conference with this theme and during this period the interest in the subject had rapidly increased More than one hundred mathematicians from twenty two countries attended the second conference and most of them presented their newest results Since it is impossible to collect all these contributions in a book of moderate size we decided to ask the 13 main speakers to write an account of their subject of interest The corresponding articles are gathered in this volume Many of them combine a sketch of the historical development with a thorough discussion of the most recent results of the fields considered We believe that these surveys are of benefit to the readers who want to be introduced to the subject as well as to the specialists We also think that this book reflects the main directions of research in this thriving area of mathematics We express our gratitude to the Deutsche Forschungsgemeinschaft whose financial support enabled us to organize the conference The Editors Introduction Fractal geometry deals with geometric objects that show a high degree of irregu larity on all levels of magnitude and therefore cannot be investigated by methods of classical geometry but nevertheless are interesting models for phenomena in physics chemistry biology astronomy and other sciences
